

Battery Operated Wet/Dry Vacs

Ridge Tool is pleased to introduce our new cordless, **battery powered** wet/dry vac. The new 3 gallon model offers a powerful motor and small footprint for any clean up job, plus the improved efficiency of the motor ensures maximum runtime. The versatile design allows either the RIDGID 18V niCd or 24V Lithium Ion batteries to power the vac.

The new BatVacs are powered by the same batteries our RIDGID cordless power tools use, so you are able to interchange all 18V and 24V batteries you have already. In addition, you can purchase separate batteries and charging kits for the vac, which can then be used with your RIDGID cordless power tools. The RapidMax™ chargers can accommodate RIDGID 9.6V to 24V batteries, and ensure complete charges in only 30 minutes time.

The RIDGID Cordless Wet/Dry Vacs offer the following features.

- Proprietary motor and patented blower wheel designed to maximize performance.
- Pleated filters have more surface area for greater efficiency and longer life
- Reduced dB level resulting in even quieter operation.
- Rugged polypropylene case is impact and corrosion resistant.
- Automatic suction shut-off senses and prevents liquid overflow.
- Vac unit converts to a powerful blower.

Model R937

Model WD2450

Model AC471811

Model AC140011

Portable Air Filtration System

A lightweight, portable air filtering unit that removes small, airborne dust particles for a cleaner work environment.

- Can be carried to jobsite or mounted between joists/studs.
- 200 cfm air flow - delivers 8 air changes per hour in a 15' x 10' room.
- 93% of debris @ 5 microns is trapped in two-stage filter design.
