Shortcut to Anti-Afterimage Instructions

▶ Do not use a damaged power cord or plug or a damaged or loose power outlet.

- Otherwise, this may result in electric shock or fire.

▶ Do not touch the power plug with wet hands when removing or plugging the plug into the outlet.

- Otherwise, this may result in electric shock.

▶ Make sure to connect the power cord to a grounded power outlet.

- Otherwise, it may result in electric shock or personal injury.

▶ Ensure that the power plug is plugged into the power outlet firmly and correctly.

- Otherwise, this may result in fire.

▶ Do not forcefully bend or pull the power plug and do not place any heavy material on it.

- Otherwise, this may result in fire.

▶ Do not connect multiple appliances to the same power outlet.

- Otherwise, this may cause fire due to overheating.

▶ Do not disconnect the power cord while using the product.

- Otherwise, this may result in damage to the product due to electric shock.

▶ To disconnect the apparatus from the mains, the plug must be pulled out from the mains socket, therefore the mains plug shall be readily operable.

- Otherwise, this may cause electric shock or fire.

▶ Use only the power cord provided by our company. Do not use the provided power cord of another product.

- Otherwise, this may result in fire or electric shock.

## Installation

Be sure to contact an authorized Service Center when installing your monitor in a location with heavy dust, high or low temperatures, high humidity, and exposed to chemical substances and where it operates for 24 hours such as at airports, train stations etc.

Failure to do so may cause serious damage to your monitor.

▶ Ensure that at least two persons lift and move the product.

- Otherwise, it may be dropped and cause personal injury, and/or damage the product.

▶ When installing the product in a cabinet or rack, make sure that the front end of the bottom of the product does not project out.

- Otherwise, it may fall or cause personal injury.

• Use a cabinet or rack of a size appropriate to the product.

▶ DO NOT PLACE CANDLES, MOSQUITO REPELLANT, CIGARETTES AND ANY HEATING APPLIANCES NEAR THE PRODUCT.

- Otherwise, this may result in fire.

- ▶ Keep heating appliances as far away from the power cord or the product as possible.
- Otherwise, this may result in electric shock or fire.

- ▶ Do not install it in a badly ventilated location such as a bookcase or closet.
- Otherwise, this may result in fire due to an increase in the internal temperature.

- ▶ When putting the product down, make sure to put it down softly.
- Otherwise, this may result in damage to the screen display.

- ▶ Do not place the front of the product on the floor.
- Otherwise, this may result in damage to the screen display.

- ▶ Ensure that an authorized installation company installs the wall mount.
- Otherwise, it may fall and cause personal injury.
- Make sure to install the specified wall mount.

- ▶ Install your product in a well ventilated location. Ensure that there is a clearance of more than 4 inches (10 cm) from the wall.
- Otherwise, it may result in fire due to an increase in the internal temperature.

- ▶ Ensure that the packaging vinyl is kept away from children.
- Otherwise, it may result in serious harm (suffocation) if children play with it.

- ▶ If the height of your monitor is adjustable, do not place any object or part of your body on the stand when lowering it.
- This may cause damage to the product or the person carrying it.

## Clean

When cleaning the monitor case or the surface of the TFT-LCD screen, wipe with a slightly moistened, soft cloth.

- ▶ Do not spray cleaner directly onto the surface of the product.
- Otherwise, this may result in the discoloration and distortion of the structure and the screen surface may peel off.

- ▶ When cleaning the power plug pins or dusting the power outlet, clean it with a dry cloth.
- Otherwise, it may result in fire.

- ▶ When cleaning the product, make sure to disconnect the power cord.
- Otherwise, it may result in electric shock or fire.

- ▶ When cleaning the product, disconnect the power cord and clean it with a soft, dry cloth.
- (Do not use chemicals such as wax, benzene, alcohol, thinner, mosquito repellent, lubricant, or cleaner.) These may change the appearance of the product surface and peel off the indication labels on the product.

- ▶ Since the product housing is easily scratched, make sure to use the specified cloth only.

- ▶ When cleaning the product, do not spray water directly onto the main body of the product.
- Ensure that water does not enter the product and that it is not wet.
- Otherwise, this may result in electric shock, fire or a malfunction.

## Others

- ▶ The product is a high voltage product. Do not disassemble, repair or modify the product yourself.
- Otherwise, this may result in electric shock or fire. If the product needs to be repaired, contact a Service Center.

- ▶ If there is a strange smell or a strange sound or smoke is coming from the product, disconnect the power plug immediately and contact a Service Center.
- Otherwise, this may result in electric shock or fire.

- ▶ Do not place this product in a location exposed to moisture, dust, smoke, water, or in a car.
- Otherwise, this may result in electric shock or fire.

- ▶ When you drop the product or the case is broken, turn the power off and disconnect the power cord. Contact a Service Center.
- Otherwise, this may result in electric shock or fire.

- ▶ If thunder or lightning is occurring, do not touch the power cord or antenna cable.
- Otherwise, this may result in electric shock or fire.

▶ Do not try to move the monitor by pulling only the wire or the signal cable.

- Otherwise, it may fall and result in electric shock, damage to the product or fire due to damage to the cable.

▶ Do not lift or move the product back and forwards or right and left while only holding the power cord or signal cables.

- Otherwise, it may fall and result in electric shock, damage to the product or fire due to damage to the cable.

▶ Make sure that the ventilating opening is not blocked by a table or curtain.

- Otherwise, it may result in fire due to an increase in the internal temperature.

▶ Do not place any containers containing water, vases, flower-pots, medicines as well as any metal on the product.

- If water or a foreign material enters the product, disconnect the power cord and contact a Service Center.

- This may result in a product malfunction, electric shock, or fire.

▶ Do not use or keep combustible spray or flammable material near the product.

- Otherwise, this may result in an explosion or fire.

▶ Do not insert any metal, such as chopsticks, coins, pins and steel, or flammable objects, such as matches or paper, inside the product (through the ventilating openings, input and output terminals, etc).

- If water or foreign material enters the product, disconnect the power cord and contact a Service Center.

- Otherwise, this may result in electric shock or fire.

▶ When using a fixed screen for a long time, an afterimage or stain may occur.

- If you are not using your product for a long period of time, put it into sleep mode or use a moving screen saver.

▶ Set a resolution and frequency appropriate to the product.

- Otherwise, your eyesight may be damaged.

▶ When using headphones or earphones, do not turn the volume too high.

- Having the sound too loud may damage your hearing.

▶ To avoid eyestrain, do not sit too close to the product.

▶ Take a rest for at least five (5) minutes after using the monitor for one (1) hour.

This reduces eye fatigue.

▶ Do not install it in an unstable location such as an unstable rack or uneven surface or a location exposed to vibrations.

- Otherwise, it may fall and cause personal injury and/or damage the product.

- If you use the product in a location exposed to vibrations, it may damage the product and result in fire.

▶ When moving the product, turn the power off and disconnect the power plug, antenna cable, and all the cables connected to the product.

- Otherwise, it may result in electric shock or fire.

▶ Ensure that children do not hang onto the product or climb up onto the product.

- The product may fall and cause personal injury or death.

▶ If you do not use the product for a long period of time, disconnect the power cord from the power outlet.

- Otherwise, this may result in overheating or fire due to dust, and may result in fire due to electric shock or leakage.

▶ Do not place any heavy items or toys or confectionery, such as cookies etc. that may attract the attention of children and to the product.

- Your children may hang onto the product causing it to fall and this may result in personal injury or death.

▶ Be careful that children do not place the battery in their mouths when removed from the remote control. Place the battery in a location that children or infants cannot reach.

- If children have had the battery in their mouths, consult your doctor immediately.

▶ When replacing the battery, insert it with the right polarity (+, -).

- Otherwise, the battery may become damaged or it may cause fire, personal injury or damage due to leakage of the internal liquid.

▶ Use only the specified standardized batteries, and do not use a new battery and a used battery at the same time.

- Otherwise, the batteries may be damaged or cause fire, personal injury or damage due to a leakage of the internal liquid.

▶ The batteries (and rechargeable batteries) are not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling.

## Safety Instructions

- The customer can return used or rechargeable batteries to a nearby public recycling center or to a store selling the same type of the battery or rechargeable battery.

- ▶ Do not place the product in a location exposed to direct sunlight or near any heat such as a fire or heater.

- This may reduce the lifetime of the product, and may result in fire.

- ▶ Do not drop any objects onto the product or cause any impact to the product.

- Otherwise, this may result in electric shock or fire.

- ▶ Do not use a humidifier near the product.

- Otherwise, this may result in electric shock or fire.

- ▶ When there is a gas leak, do not touch the product or the power plug; ventilate immediately.

- If a spark occurs, it may cause an explosion or fire.

- ▶ If the product has been turned on for a long time, the display panel becomes hot. Do not touch it.

- ▶ Keep the small accessories in a location out of the reach of children.

- ▶ Be careful when adjusting the angle of the product or the height of the stand.

- This may result in personal injury as your hand or fingers may become caught.

- Also, if you tilt the product too far, it may fall and cause personal injury.

- ▶ Do not install the product in a location low enough for children to reach.

- Otherwise, it may fall and result in personal injury.

- Since the front part of the product is heavy, install the product on a level and stable surface.

- ▶ Do not put any heavy objects on the product.

- This may result in personal injury and/or damage to the product.

*Kensington Lock*

A Kensington Lock is an anti-theft device that enables users to lock the product so that they can safely use it in public locations. Since the shape and usage of the locking device may differ depending on the model and the manufacturer, refer to the User Manual supplied with the locking device for more information.

 **Note**

You must purchase the Kensington Lock separately.

**To lock the product, follow these steps:**

1. Wrap the Kensington lock cable around a large, stationary object such as a desk or chair.
2. Slide the end of the cable with the lock attached through the looped end of the Kensington lock cable.
3. Insert the locking device into the Kensington slot on the Monitor ( **A** ).
4. Lock the lock ( **B** ).

 **Note**

- These are general instructions. For exact instructions, see the User Manual supplied with the locking device.

- You can purchase the locking device from an electronics store, an online shop, or our service center.

 **Note**

See Connecting Cables for further information regarding cable connections.

**Remote Control**

 **Note**

The performance of the remote control may be affected by a TV or other electronic device operating near the LCD Display, causing a malfunction due to interference with the frequency.

3. Check the installation diagram and mark the drill points on the wall. Use the 5.0 mm bit to drill holes deeper than 35 mm. Fix each anchor in the corresponding hole. Match each

of the brackets and hinge holes to the corresponding anchor holes and insert and tighten the 11 screws A.

### To mount the product on the wall bracket

The shape of the product may vary depending on the model. (The assemblies of the plastic hanger and the screw are the same)

1. Remove the 4 screws on the back of the product.

2. Insert the screw B into the plastic hanger.

 **Notice**

- Mount the product on the wall bracket and make sure it is properly fixed to the left and right plastic hangers.
  - Be careful when installing the product on the bracket as fingers can be caught in the holes.
  - Make sure the wall bracket is securely fixed to the wall, or the product may not stay in place after installation.
3. Tighten the 4 screws in step 2 (plastic hanger + screw B) to the rear holes of the product.

4. Remove safety pin (3) and insert the 4 product holders into the corresponding bracket holes (1). Then place the product(2) so that it is firmly fixed to the bracket. Make sure to re-insert and tighten the safety pin (3) to securely hold the product to the bracket.

- C - Wall

### Wall Bracket Angle Adjustment

Adjust the bracket angle to  $-2^{\circ}$  before installing it on the wall.

1. Fix the product to the wall bracket.
2. Hold the product at the top in the center and pull it forward (direction of the arrow) to adjust the angle.

 **Note**

You can adjust the bracket angle between  $-2^{\circ}$  and  $15^{\circ}$ .

Make sure to use the top center, and not the left or the right side of the product to adjust the angle.

# Connections

## Connecting a Computer

- 1 There are several ways to connect the computer to the monitor. Choose one from the following options.

1-1 Using the D-sub (Analog) connector on the video card.

- Connect the D-sub to the 15-pin, [RGB / COMPONENT / AV IN] port on the back of your LCD Display and the 15 pin D-sub Port on the computer.

1-2 Using the HDMI (digital) output on the graphics card.

- Connect the [HDMI IN] port on the LCD Display to the HDMI port on the PC using the HDMI cable.

 **Note**

When the HDMI cable to the PC, ensure that you select **HDMI** from both the **Source List** and **Edit Name** before selecting **PC** or **DVI** device so that normal PC screen and sound can be outputted. Note that sound is only available when connected according to the option **2** that follows.

- 2** Connect the Audio cable for your LCD Display to the Audio port on the back of the LCD Display.
- 3** Connect the power cord for your LCD Display to the Power port on the back of the LCD Display. Turn on the power switch.

 **Note**

- Turn on both your computer and the LCD Display.
- Contact a local SAMSUNG Electronics Service Center to buy optional items.

### Connecting to Other devices

 **Note**

- AV input devices such as DVD players, VCRs or camcorders as well as your computer can be connected to the LCD Display. For detailed information on connecting AV input devices, refer to the contents under Adjusting Your LCD Display.
- The LCD Display 's configuration at the back may vary slightly depending on the LCD Display model.

### Connecting an External Monitor

1. Connect between the [DVI OUT(LOOP OUT)] port on the LCD Display and the input port on another monitor using a DVI cable.
2. Connect between the [AUDIO OUT] port on the LCD Display and the audio input port on another monitor using a stereo cable.
3. Select DVI using the SOURCE button on the front of the LCD Display or on the remote control.

 **Note**

DVI OUT does not support HDCP.

### Connecting Using a RGB to AV Cable

1. Connect the RGB to AV cable to the [RGB/COMPONENT/AV IN] port on the monitor.

2. Connect a set of audio cables between the [AUDIO IN] on the LCD Display and the AUDIO OUT jacks on the DVD player.

 **Note**

- Select **AV** for the connection to a DVD player using the SOURCE button on the front of the LCD Display or on the remote control.
- Then, start the DVD Player with a DVD disc inserted.
- A RGB to AV cable is optional.

### Connecting Using a HDMI Cable

1. Connect input devices such as a Blu-Ray/DVD player to the [HDMI IN] terminal of the LCD Display using an HDMI cable.
2. Select **HDMI** using the SOURCE button on the front of the LCD Display or on the remote control.

 **Note**

In **HDMI** mode, only PCM format audio is supported.

## Connecting Using a DVI to HDMI Cable

1. Connect the DVI output terminal of a digital output device to the [HDMI IN] terminal of the LCD Display using a DVI to HDMI cable.
2. Connect the red and white jacks of an RCA to stereo (for PC) cable to the same colored audio output terminals of the digital output device, and connect the opposite jack to the [AUDIO IN] terminal of the LCD Display.
3. Select **HDMI** using the SOURCE button on the front of the LCD Display or on the remote control.

## Connecting a DVD Player

1. Connect a RGB to Component cable between the [RGB / COMPONENT / AV IN] port on the LCD Display and the P<sub>R</sub>, Y, P<sub>B</sub> jacks on the DVD player.

2. Connect a set of audio cables between the [AUDIO IN] on the LCD Display and the AUDIO OUT jacks on the DVD player.

 **Note**

- Select **Component** for the connection to a DVD player using the SOURCE button on the front of the LCD Display or on the remote control.
- Then, start the DVD Player with a DVD disc inserted.
- A **RGB to component** cable is optional.
- For an explanation of Component video, consult your DVD manual.

### Connecting a DTV Set Top (Cable/Satellite) Box

1. Connect a RGB to Component cable between the [RGB / COMPONENT / AV IN] port on the LCD Display and the P<sub>R</sub>, Y, P<sub>B</sub> jacks on the Set Top Box.
2. Connect a set of audio cables between the [AUDIO IN] on the LCD Display and the AUDIO OUT jacks on the Set Top Box.

 **Note**

- Select **Component** for the connection to a DTV Set Top Box using the SOURCE button on the front of the LCD Display or on the remote control.
- For an explanation of Component video, see your Set Top Box owner's manual.

## Connecting to an Audio System

1. Connect a set of audio cables between the AUX L, R jacks on the AUDIO SYSTEM and [AUDIO OUT] on LCD Display.

## Connecting a LAN Cable

Connect the LAN cable.

 **Note**

Applicable to the EXn model only.

### Connecting a USB devices

You can connect USB devices such as a mouse or keyboard.

 **Note**

Applicable to the **EXn** model only.

### Assembling the Cables

 **Note**

Do not pull the cables too hard when arranging them. This may cause damage to the product's connection terminals.

## Multiple Display Control *MDC System*

### Introduction

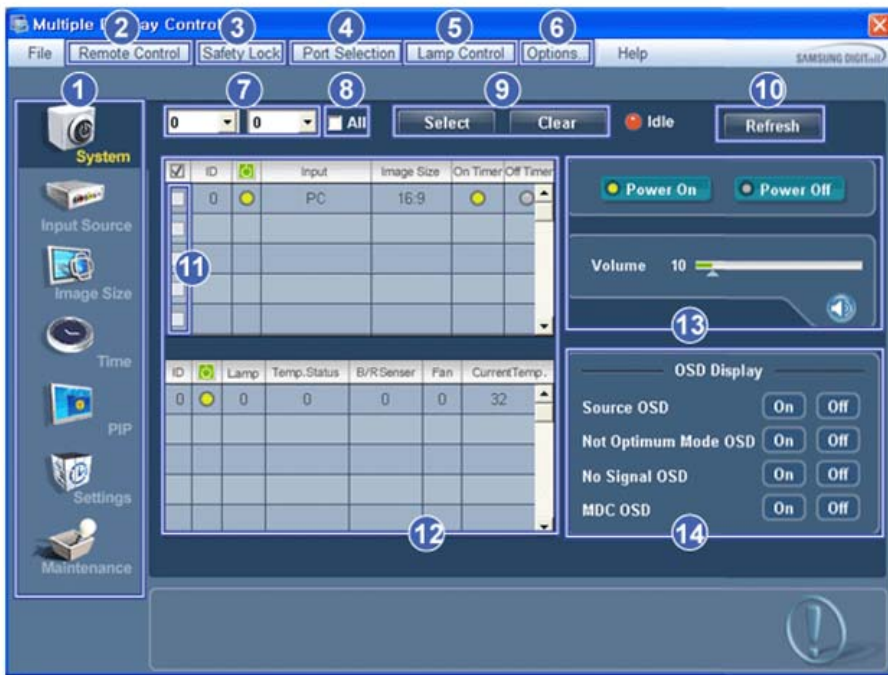

A Multiple Display Control (MDC) is an application allowing various displays to be easily and simultaneously operated on a PC. RS-232C, a standard of serial communication, is used for the communication between a PC and a display. Therefore, a serial cable should be connected between the serial port on a PC and the serial port on a display.

### Main Screen

Click Start > Program > Samsung > MDC System to start the program.

Select a set to see the volume of the selected set within the slider.

- |                      |                      |
|----------------------|----------------------|
| 1 Main Icons         | 8 All                |
| 2 Remote control     | 9 Selection Buttons  |
| 3 Safety Lock        | 10 Refresh           |
| 4 Port Selection     | 11 Display Selection |
| 5 Lamp Control       | 12 Info Grid         |
| 6 Option...          | 13 Control Tools     |

1. Use the main icons to switch into each screen.
2. Allows you to enable or disable the remote control signal receiving function of the display unit.
3. Set the Safety Lock function.  
When setting the Lock function, you can only operate power and lock buttons on the remote control and set.
4. The setting for the PC Serial Port can change. The original value is COM1.
5. Selects a Lamp adjustment mode.
6. Adjusts the number of LFD IDs and the frequency of search repeats.
7. Defines the range of LFD IDs to display. You can select or deselect the displayed IDs using the Select or Clear button.
8. All of the monitors can be selected or deselected.
9. Selects (Select) or deselects (Clear) LFD IDs displayed by configuring 7 and 8.
10. This searches for monitors. The maximum number is indicated in the Max LFD Id field.
11. Select a display from Display Selection.
12. Use Grid to view brief information on selected display.
13. Use Control Tools to control displays.
14. Switches the OSD function On/Off.  
- May not be supported depending on the product.

**<Note>** The remote control Enable/Disable function operates whether or not the power is On/Off, and this applies to all displays connected to the MDC. However, regardless of the status at the time the MDC is shut down, the remote control signal receiving function of all displays is initialized to Enable when the MDC is closed.

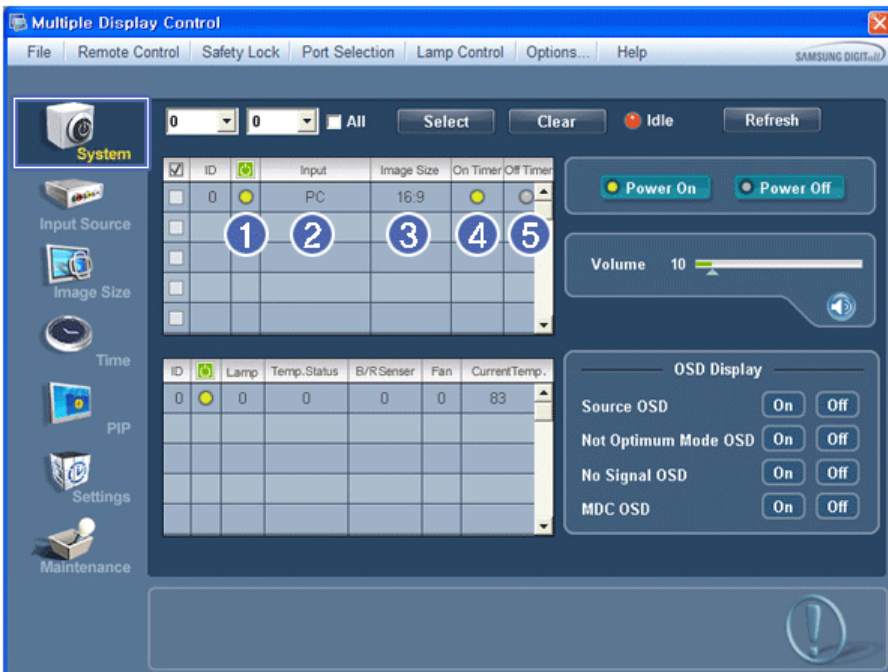

## Port Selection

1. The Multiple Display Control is originally set to COM1.
2. If any port other than COM1 is used, COM1 through COM4 can be selected in the Port Selection Menu.
3. If the exact port name that is connected to the LCD Display using a serial cable is not selected, communication will be unavailable.
4. The selected port is stored in the program and used for the next program as well.

## Troubleshooting

1. The display you wish to control does not appear on the System Info Grid
  - Check the connection of RS232C. (Check if it is properly connected to the Com1 port)
  - Check the displays to see if any of the other displays connected have the same ID. If more than one displays have the same ID, those displays are not properly detected by the program due to data conflict.
  - For monitors that support a Set ID between 0 to 99, you have to set the Set ID to a value between 0 and 99.

**Note :** Check if the Set ID of the monitor is a value between 0 and 99 (set the value using the Display menu).
2. The display you wish to control does not appear on the other Control Info Grids
  - Check to see if the display power is ON. (You can check this in System Info Grid)
  - Check if you can change the input source of the display.
3. The dialogue box appears repeatedly.
  - Check to see if the display you wish to control is selected.
4. Both On Timer and Off Timer have been set but different time is showing.
  - Apply current time to synchronize the display clocks.
5. The remote may not function properly when you turn off the remote Function, disconnect the RS-232C cable, or exit the program in an Irregular manner. Rerun the program and turn the remote function again to Restore normal functions.

<Note> This program may malfunction due to problems in communication circuits or interference from electronic appliances nearby.

## Settings Value Display In Multiple Display Mode

\* When there are more than one displays connected, the settings values are displayed as follows.

1. No selection: Displays the Factory Default Value.
2. Selected one display: Fetches and displays the settings value for the selected display.
3. Selected one display (ID1) and add another display (ID3): The program, which was displaying the settings value of ID 1, fetches and displays the value of ID3.
4. If all sets are selected at the same time by clicking All and Select, the default value will be restored.

Multiple Display Control

# MDC System

## Introduction

Unlike the previous method which used the serial data communication specifications RS-232C, an Ethernet function has been added. Connect the first display device and the PC by entering the IP address. To connect to another display device, use an RS-232C serial cable. Refer to the figure above.

## Main Screen

Click Start > Program > Samsung > MDC System to start the program.

Select a set to see the volume of the selected set within the slider.

- |                      |                     |
|----------------------|---------------------|
| ① Main Icons         | ⑥ Lamp Control      |

### 4) Viewing Screen Splits

- You can view and change the layout of screens using the Screen Divider settings.

- \* **The range of the Screen Divider setting may differ depending on the model.**
- \* **You may not operate this function in MagicInfo.**
- \* **The Input source of TV works only on TV model.**
- \* **The Maintenance Control function is available only for the displays where the power status is ON.**

## Troubleshooting

### 1. The display you wish to control does not appear on the System Info Grid

- Check if the entered IP address is correct and check the connection status of the Ethernet cable.
- Check the displays to see if any of the other displays connected have the same ID. If more than one displays have the same ID, those displays are not properly detected by the program due to data conflict.
- For monitors that support a Set ID between 0 to 99, you have to set the Set ID to a value between 0 and 99.

**Note :** Check if the Set ID of the monitor is a value between 0 and 99 (set the value using the Display menu).

### 2. The display you wish to control does not appear on the other Control Info Grids

- Check to see if the display power is ON. (You can check this in System Info Grid)
- Check if you can change the input source of the display.

### 3. The dialogue box appears repeatedly.

- Check to see if the display you wish to control is selected.

### 4. Both On Timer and Off Timer have been set but different time is showing.

- Apply current time to synchronize the display clocks.

### 5. The remote may not function properly when you turn off the remote Function, disconnect the Ethernet cable, or exit the program in an Irregular manner. Rerun the program and turn the remote function again to Restore normal functions.

<**Note**> This program may malfunction due to problems in communication circuits or interference from electronic appliances nearby.

## Settings Value Display In Multiple Display Mode

\* When there are more than one displays connected, the settings values are displayed as follows.

1. No selection: Displays the Factory Default Value.
2. Selected one display: Fetches and displays the settings value for the selected display.
3. Selected one display (ID1) and add another display (ID3): The program, which was displaying the settings value of ID 1, fetches and displays the value of ID3.
4. If all sets are selected at the same time by clicking All and Select, the default value will be restored.

### MagicBright **PM**

MENU → ▼ → ENTER → [Picture] → ENTER → [MagicBright]

→ ▲, ▼ → ENTER

**MagicBright** is a feature providing the optimum viewing environment depending on the contents of the image you are watching. Currently four different modes are available: **Entertain**, **Internet**, **Text** and **Custom**. Each mode has its own pre-configured brightness value.

 **Note**

Not available when Dynamic Contrast is set to On.

1. **Entertain**

High brightness

For watching motion pictures such as from a DVD or VCR.

2. **Internet**

Medium brightness

For working with a mixture of images such as texts and graphics.

3. **Text**

Normal brightness

For documents or works involving heavy text.

4. **Custom**

Although the values are carefully chosen by our engineers, the pre-configured values may not be comfortable to your eyes depending on your taste.

If this is the case, adjust the brightness and contrast by using the OSD menu.

## Custom

By using the on-screen menus, the contrast and brightness can be changed to your personal preference.

MENU → ▼ → ENTER → [Picture] → ▼ → ENTER → [Custom]

# Troubleshooting

## Self-Test Feature Check

Check the following items yourself before calling for assistance. Contact a Service Center for problems that you cannot solve by yourself.

## Self-Test Feature Check

1. Turn off both your computer and the LCD Display.
2. Unplug the video cable from the back of the computer.
3. Turn on the LCD Display.

The figure shown below ("No Signal") appears on a black background when the LCD Display is working normally even though no video signal is detected: While in the Self-Test mode, the LED power indicator remains green and the figure moves around on the screen.

4. Turn off your LCD Display and reconnect the video cable; then turn on both your computer and the LCD Display

If your LCD Display screen remains blank after using the previous procedure, check your video controller and computer system; your LCD Display is functioning properly.

## Warning Messages

You can even view the screen at a resolution of 1920 x 1080. However, you will receive the following message for a minute; You can choose to change the screen resolution or stay in the current mode during that time. If the resolution is more than 85Hz, you will see the black screen because the LCD Display does not support over 85Hz.

Refer to Specifications > Preset Timing Modes for the resolutions or frequencies supported by the LCD Display.

## Maintenance and Cleaning

- 1) Maintaining the LCD Display Case.

Clean with a soft cloth after disconnecting the power cord.

- Do not use benzene, thinner or other flammable substances.

## 2) Maintaining the Flat Panel Display Screen.

Clean with a soft cloth (cotton flannel).

- Never use acetone, benzene or thinner.  
(They may cause flaws or deformation of the screen surface.)
- The user is responsible for any damage caused by using these substances.

## Symptoms and Recommended Actions

### Note

A LCD Display recreates visual signals received from the computer. Therefore, if there is a problem with the computer or the video card, this can cause the LCD Display to become blank, have poor coloring, become noisy, etc. In this case, first check the source of the problem, and then contact a Service Center or your dealer.

1. Check if the power cord and the video cables are properly connected to the computer.
2. Check if the computer beeps more than 3 times when booting.  
(If it does, request service.)
3. If you installed a new video card or if you assembled the PC, check if you installed the Adaptor(video).
4. Check if the scanning ratio of the video screen is set to between 50 Hz ~ 85 Hz.  
(Do not exceed 60Hz when using the maximum resolution.)
5. If you have problems in installing the Adaptor (video) driver, boot the computer in Safe Mode, remove the Display Adaptor in the "Control Panel -> System -> Device Administrator" and then reboot the computer to reinstall the Adaptor (video) driver.

### Plug and Play Capability

---

This LCD Display can be installed on any Plug & Play compatible system. The interaction of the LCD Display and the computer systems will provide the best operating conditions and LCD Display settings. In most cases, the LCD Display installation will proceed automatically, unless the user wishes to select alternate settings.

### Dot Acceptable

---

TFT-LCD panels manufactured by using advanced semiconductor technology with precision of 1ppm (one millionth) above are used for this product. But the pixels of RED, GREEN, BLUE and WHITE color appear to be bright sometimes or some black pixels may be seen. This is not from bad quality and you can use it without any problems.

For example, the number of TFT-LCD sub pixels contained in this product are 6,220,800.

#### Note

## PowerSaver

This LCD Display has a built-in power management system called PowerSaver. This system saves energy by switching your LCD Display to low-power mode when it has not been used for a certain amount of time. The LCD Display automatically returns to normal operation when you press a key on the keyboard. For energy conservation, turn your LCD Display OFF when it is not needed, or when leaving it unattended for long periods. The PowerSaver system operates with a VESA DPM compliant video card installed in your computer. Use the software utility installed on your computer to set up this feature.

 **Note**

- The actual power consumption may be different from the indicated power consumption if the system condition or settings are changed.
- To stop any power consumption, turn off the switch or disconnect the power cable on the back. Be sure to disconnect the power if you intend to stay away from home for many hours.

## Preset Timing Modes

If the signal transferred from the computer is the same as the following Preset Timing Modes, the screen will be adjusted automatically. However, if the signal differs, the screen may go blank while the power LED is on. Refer to the video card manual and adjusts the screen as follows.

#### Horizontal Frequency

The time to scan one line connecting the right edge to the left edge of the screen horizontally is called the Horizontal Cycle and the inverse number of the Horizontal Cycle is called the Horizontal Frequency. Unit: kHz

#### Vertical Frequency

Like a fluorescent lamp, the screen has to repeat the same image many times per second to display an image to the user. The frequency of this repetition is called the Vertical Frequency or Refresh Rate. Unit: Hz

# Information

## For a Better Display

- Adjust the computer resolution and screen injection rate (refresh rate) on the computer as described below to enjoy the best picture quality. You can have an uneven picture quality on screen if the best picture quality is not provided for TFT-LCD.
- Resolution: 1920 x 1080
- Vertical frequency (refresh rate): 60 Hz
- TFT-LCD panels manufactured by using advanced semiconductor technology with a precision of 1ppm (one millionth) and above is used for this product. But the pixels of RED, GREEN, BLUE and WHITE color seem to be bright sometimes or some of black pixels could be seen. This is not from bad quality and you can use it without any problems.
- For example, the number of TFT-LCD sub pixels contained in this product are 6,220,800.
- When cleaning the monitor and the panel outside, please apply a small amount of water to a soft cloth. Rub softly when cleaning the LCD area. If excessive force is applied, you may stain it.
- If you are not satisfied with the picture quality, you can get better quality of picture by performing the "**Auto Adjustment** function" in display screen that is appeared as window termination button is pressed. If there's still noise after the automatic adjustment, use the **Fine/Coarse** adjustment function.
- When viewing a fixed screen for an extended period of time, a residual image or blurriness may appear. Change the mode to energy save or set a screensaver to move the picture when you need to be away from the monitor for an extended period of time.

## PRODUCT INFORMATION (Image Retention Free)

### ➤ *What is Image Retention ?*

Image retention may not occur when a LCD panel is operated under normal conditions.

Normal conditions are defined as continuously changing video patterns. When the LCD panel is operated for a long time with a fixed pattern (over 12 hours), there may be slight difference in voltage between electrodes that work the liquid crystal (LC) in a pixel. The voltage difference between electrodes increases with time, forcing the liquid crystal to lean. When this occurs, the previous image may be seen when the pattern is changed. To prevent this, the accumulated voltage difference must be decreased.

⊕ *Power Off, Screen Saver, or Power Save Mode*

- Turn the power off for 2 hours after 12 hours in use
- Set the Monitor to power off with the PC Display Properties Power Scheme.
- Use a Screen saver if possible - Screen saver in one color or a moving image is recommended.
- The Image Retention Free function applied to the product is recommended.

- For detailed configuration procedures, refer to the back page.

**+** *Change the Color Information periodically*

**Note**

Use Two different colors

Rotate the Color Information with 2 different colors every 30 minutes.

- Avoid using a combination of characters and background color with large difference in luminance.

Avoid using Grey colors, which can cause Image retention easily.

Avoid: Colors with big difference in luminance (Black & White, Grey)

**+** *Change the characters color periodically*

- Use Bright colors with little difference in luminance.

- Cycle : Change the characters color and background color every 30 minutes

- Every 30 minutes, change the characters with movement.

- Have the images and logo cycle periodically.

- Cycle: Display moving image together with Logo for 60 seconds after 4 hours in use.

- The best way to protect your monitor from Image retention is to turn the Power off, or set your PC or System to operate a Screen Saver program when you are not using it. If these guidelines are not followed, it may affect your warranty.

**+** *Apply the Screen Scroll function on Product*

- Apply the Screen Scroll function

- Symptom: Horizontal Bar with Black Color move up and down.

+ Apply the Screen Pixel function on Product

• Apply the Screen Pixel function

- Symptom: Dot with Black Color move up and down.

• Apply the Screen Bar function

- Symptom: Horizontal / Vertical Bar with Black Color move up and down.

+ Apply the Screen Erasing function on Product

• Apply the Screen Erasing function

- Symptom: 2 Vertical blocks move while erasing the display

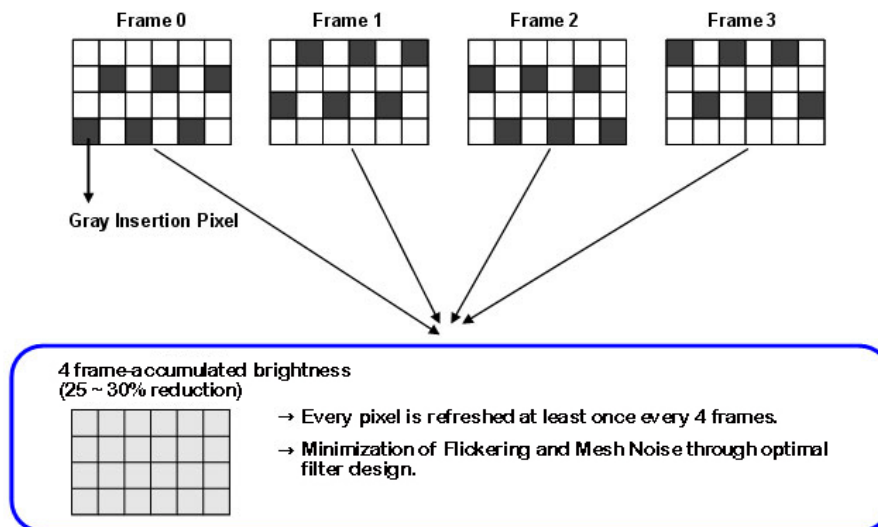

+ Apply the Image Retention Free function on Product

• Select the Apply Image Retention Free function.

+ The Image Retention Free algorithm has been applied to the LCD LFD

• The Gray Insertion algorithm has been applied to each pixel to improve the image retention characteristics.

➤ *Restrictions because of the application of the Image Retention Free algorithm.*

- The Pixel Gray Insertion algorithm has been applied.
  - Therefore, the luminance is reduced (25~30%) on the basis of the original luminance. In addition, the inserted gray pixels may appear distorted (mesh, jitter) when the screen is viewed by a user who is moving horizontally or vertically or is viewed from a short distance
- When watching the screen moving horizontally or vertically: The mesh noise occurs and the luminance is reduced (25 ~ 30%)
- When watching the screen from a short distance: The jitter noise causes one-pixel-size characters and lines to tremble.
- Flickering that appears in a specific pattern

➤ *Usage Guide*

- Usage Conditions: Using it for 12 hours and then turning it off for 2 hours is recommended..
- Factory Default: **Image Retention Free** function: **OFF**
- To minimize the effects of the luminance reduction due to the function, using the function after setting the screen brightness to the highest level is recommended.

E.g. **MagicBright** Mode: **Entertain**

- A picture that is larger than a Four Pixel Line / Two Pixel Size character is recommended.
  - In a One Pixel Line / Character picture, the jitter noise or flickering may appear.

**Terms**

Dot Pitch	The image on a monitor is composed of red, green and blue dots. The closer the dots, the higher the resolution. The distance between two dots of the same color is called the 'Dot Pitch'. Unit: mm
-----------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Vertical Frequency	<p>The screen must be redrawn several times per second in order to create and display an image for the user. The frequency of this repetition per second is called the Vertical Frequency or Refresh Rate. Unit: Hz</p> <p>Example: If the same light repeats itself 60 times per second, this is regarded as 60 Hz.</p>
Horizontal Frequency	<p>The time to scan one line connecting the right edge to the left edge of the screen horizontally is called the Horizontal Cycle. The inverse number of the Horizontal Cycle is called Horizontal Frequency. Unit: kHz</p>
Interlace and Non-Interlace Methods	<p>Showing the horizontal lines of the screen from the top to the bottom sequentially is called the Non-Interlace method while showing odd lines and then even lines in turn is called the Interlace method. The Non-Interlace method is used for the majority of monitors to ensure a clear image. The Interlace method is the same as that used in TVs.</p>
Plug & Play	<p>This is a function that provides the best quality screen for the user by allowing the computer and the monitor to exchange information automatically. This monitor follows the international standard VESA DDC for the Plug &amp; Play function.</p>
Resolution	<p>The number of horizontal and vertical dots used to compose the screen image is called the 'resolution'. This number shows the accuracy of the display. A high resolution is good for performing multiple tasks as more image information can be shown on the screen.</p> <p>Example: If the resolution is 1920 x 1080, this means the screen is composed of 1920 horizontal dots (horizontal resolution) and 1080 vertical lines (vertical resolution).</p>

## Correct Disposal

### Correct Disposal of This Product (Waste Electrical & Electronic Equipment) - Europe only

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.

### Correct disposal of batteries in this product - Europe only

(Applicable in the European Union and other European countries with separate battery return systems.)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
