

Enhance your PC audio experience

Designed so you can get the most out of your PC audio experience. Ideal for voice and video chat, IP telephony, interactive training, and even gaming or music – in fact for just about anything you might want to listen to either from your PC or MAC.

For your most demanding applications, choose the premium performance of the Jabra GN5035. Benefits include the 40mm Neodymium speaker drivers, flexible boom, noise-canceling microphone and in-line mute and volume controls. And pivoting speakers that make it easy to carry and store. Then the Jabra GN5035 adds to your comfort with ultra-plush ear cushions.

But what's really different about the Jabra GN5035 is its direct-to-digital USB connection. The USB interface gives you pristine, digital quality, stereo sound. A stronger, interference-free signal (because you're bypassing your computer's sound card). And plug-and-play compatibility with Microsoft® Windows® XP, ME, 2000 and 98 SE, as well as Mac® OS 9.2 and OS X.

- Direct-to-digital USB connection.
- 40mm Neodymium speaker drivers.
- Optimal voice quality.
