DELL™ OPTIPLEX™ 960

Professional users seeking a sophisticated, powerful desktop need to look no further than the OptiPlex 960. The stylish new OptiPlex 960 delivers advanced technologies to tackle any challenge without missing a beat. Available with top-of-the-line processors, generous memory options, native support for dual high-resolution displays, and a diskless option to support flexible computing environments are just a sampling of the built-in productivity options available. Protect systems and data with your choice of leading-edge hardware and software security options. Rest easy knowing IT professionals will have the system management tools they need, with the global Dell service and support options to cover systems from acquisition to asset retirement. Performance at the OptiPlex 960 level is just one of the reasons Dell is a world leader in business desktops—and why OptiPlex is the easiest choice you'll make today.

OPTIPLEX MEANS BUSINESS

The OptiPlex 960 delivers serious performance in a scalable platform you can build a business on:

Long-range planning support with up to a 24-month lifecycle, stable images, and managed transitions

Horsepower for your users' demanding applications with options including the Intel® Core™2 Quad Processor

Advanced manageability tools for IT, including next generation Intel® vPro™ technology

Smaller redesigned chassis including a space saving all-in-one option

OPTIPLEX SECURITY

From hardware to software, from local to remote, The OptiPlex 960 gives you the power to choose your level of security:

Isolate system threats and protect your network infrastructure with Intel® vPro™ client isolation features

Protect sensitive data with optional full disk encryption hard drives

Built-in TPM helps protect the network from unauthorized access, while enabling multi-factor authentication via optional Smart Card Reader and/or fingerprint reader (note, TPM may not be available in all countries)

OPTIPLEX IS EASY TO OWN

Productivity meets manageability in the OptiPlex 960, with a suite of highly customizable, global service and support options throughout the PC lifecycle. For users and IT professionals alike, the OptiPlex 960 is easy to own, enabling:

Remote system diagnosis and repair, reducing desk-side visits with Intel® vPro™ technology

Faster repairs for users with Intel® vPro™ Fast Call for Help Technology enabling end-user initiated remote support

Ease of deployment with the OptiPlex 960's support for integrated wireless networking

Time-saving tool-less cover removal for access to tool-less internal components

OPTIPLEX GETS GREEN

Dell is committed to being the greenest PC company on the planet. And the OptiPlex 960 delivers:

Help reduce power consumption—and cost—with Dell's power supply, which is up to 88% efficient

Enjoy a quieter workplace with Dell's ultra-silent QuietKit noise-reduction solution

Reduced environmental impact with systems built with 10% post-consumer recycled content

Minimize power usage with Dell EnergySmart power management technology

Environmental sensitivity with the OptiPlex 960's Energy Star, EPEAT-Gold, TCO, and Blue Angel certification

PROCESSOR

NOTE: Global Standard Products (GSP) are a subset of Dell's relationship products that are managed for availability and synchronized transitions on a worldwide basis. They ensure the same platform is available for purchase globally. This allows customers to reduce the number of configurations managed on a worldwide basis, thereby reducing their costs. They also enable companies to implement global IT standards by locking in specific product configurations worldwide. The following GSP processors identified below will be made available to Dell customers.

NOTE: Processor numbers are not a measure of performance.

ADVANCED SYSTEM MANAGEABILITY MODES

NOTE: Hardware management mode options allow you to select the right systems management feature support for your enterprise. Dell’s innovative approach to scalable remote client management offers you a choice of built-in hardware management capabilities across platform offerings.

The latest generation of Intel® vPro™ technology provides the capability to manage your install base of systems regardless of the power state or hardware functionality of the system.

This functionality allows IT to address many issues remotely rather than having to physically visit systems.

The OptiPlex 960 supports the latest generation of Intel® vPro™ technology.

Intel® iAMT technology/ Intel® vPro™ technology support the following features:

Asset reporting and inventory capabilities, Remote troubleshooting and repair, Client System Isolation, Remote patching/ updating

Intel® vPro™ technology adds these additional features:

Client initialed “Fast Call for Help”/ beyond firewall systems management capability, Microsoft NAP support, Hardened security monitoring, Support for the latest generation of Intel® Core™ 2 Quad Processors

*The functionality described above requires an appropriate software management console

MEMORY

Your computer supports a maximum of 8GB of memory when you use four 2GB DIMMs; however, 32-bit operating systems, such as the 32-bit version of Microsoft® Windows® XP, can only use a maximum of 4GB of address space. Moreover, certain components within the computer require address space in the 4GB range. Any address space reserved for these components cannot be used by computer memory; therefore, the amount of memory available to the operating system is less than 4GB.

NOTE: The entire 8GB memory range is available to 64-bit operating systems.

Memory modules should be installed in pairs of matched memory size, speed, and technology. If the memory modules are not installed in matched pairs, the computer will continue to operate, but with a slight reduction in performance.

¹The total amount of available memory will be less than 4GB. The amount less depends on the actual system configuration. To fully utilize 4GB or more of memory requires a 64-bit enabled processor and 64-bit operating system.

¹ These form factors utilize a more efficient Active Power Factor Correction (APFC) power supply. Dell recommends only Universal Power Supplies (UPS) based on Sine Wave output for APFC PSUs, not an approximation of a Sine Wave, Square Wave, or quasi-Square Wave (see UPS technical specifications). If you have questions, please contact the manufacture to confirm the output type.

CHASSIS ENCLOSURE & VENTILATION REQUIREMENTS

ENCLOSURE VENTILATION

If your enclosure has doors, they need to be of a type that allows at least 30% airflow through the enclosure (front and back).

ENCLOSURE MINIMUM CLEARANCE

Leave a 10.2 cm (4 in.) minimum clearance on all vented sides of the computer to permit the airflow required for proper ventilation.

RECOMMENDED ENCLOSURE

Do not install your computer in an enclosure that does not allow airflow. This restricts the airflow and impacts your computer's performance, possibly causing it to overheat.

OPEN DESK MINIMUM CLEARANCE

If your computer is installed in a corner, on a desk, or under a desk, leave at least 5.1 cm (2 in.) clearance from the back of the computer to the wall to permit the airflow required for proper ventilation.

REGULATORY COMPLIANCE AND ENVIRONMENTAL
