# OPERATOR'S MANUAL

## IMPORTANT

## READ SAFETY RULES AND INSTRUCTIONS CAREFULLY BEFORE OPERATION

**Warning:** This unit is equipped with an internal combustion engine and should not be used on or near any unimproved forest-covered, brushcovered or grass-covered land unless the engine's exhaust system is equipped with a spark arrester meeting applicable local or state laws (if any). If a spark arrester is used, it should be maintained in effective working order by the operator. In the State of California the above is required by law (Section 4442 of the California Public Resources Code). Other states may have similar laws. Federal laws apply on federal lands. A spark arrester for the muffler is available through your nearest engine authorized service dealer or contact the service department, P.O. Box 361131 Cleveland, Ohio 44136-0019.

PRINTED IN U.S.A.

TROY BILT LLC, P.O. BOX 361131 CLEVELAND, OHIO 44136-0019

FORM NO. 769-00830B 6/01/2005 This Operator's Manual is an important part of your new chipper shredder. It will help you assemble, prepare and maintain the unit for best performance. Please read and understand what it says.

## **Finding and Recording Model Number**

# BEFORE YOU START ASSEMBLING YOUR NEW EQUIPMENT.

please locate the model plate on the equipment and copy the information to the sample model plate provided to the right. You can locate the model plate by standing behind the unit and looking down at the frame below the engine. This information will be necessary to use the manufacturer's web site and/or obtain assistance from the Customer Support Department or an authorized service dealer.

## **Customer Support**

# Please do *NOT* return the unit to the retailer from which it was purchased, without first contacting Customer Support.

If you have difficulty assembling this product or have any questions regarding the controls, operation, or maintenance of this unit, you can seek help from the experts. Choose from the options below:

- 1. Visit **mtdproducts.com**. Click on the Service & Support menu option.
- 2. Phone a Customer Support Representative at 1 (800) 520-5520.
- The engine manufacturer is responsible for all engine-related issues with regards to performance, power-rating, specifications, warranty and service. Please refer to the engine manufacturer's Owner's/Operator's Manual, packed separately with your unit, for more information.

  Do not tow shredder for long distances Before towing, be certain the shredder is correctly attached to towing vehicle \$30228

Do not allow anyone to sit or ride on

WARNING

This symbol points out important safety instructions which, if not followed, could endanger the personal safety and/or property of yourself and others. Read and follow all instructions in this manual before attempting to operate this machine. Failure to comply with these instructions may result in personal injury. When you see this symbol.

## **HEED ITS WARNING!**

Your Responsibility Restrict the use of this power machine to persons who read, understand and follow the warnings and instructions in this manual and on the machine.

**WARNING:** Engine Exhaust, some of its constituents, and certain vehicle components contain or emit chemicals known to State of California to cause cancer and birth defects or other reproductive harm.

**DANGER:** This machine was built to be operated according to the rules for safe operation in this manual. As with any type of power equipment, carelessness or error on the part of the operator can result in serious injury. This machine is capable of amputating hands and feet and throwing objects. Failure to observe the following safety instructions could result in serious injury or death.

# Safe Operation Practices

This symbol points out important safety instructions which, if not followed, could endanger the personal safety and/or property of yourself and others. Read and follow all instructions in this manual before attempting to operate this machine. Failure to comply with these instructions may result in personal injury. When you see this symbol.

#### HEED ITS WARNING!

Your Responsibility Restrict the use of this power machine to persons who read, understand and follow the warnings and instructions in this manual and on the machine.

## Training

- Read, understand, and follow all instructions on the machine and in the manual(s) before attempting to assemble and operate. Keep this manual in a safe place for future and regular reference and for ordering replacement parts.
- 2. Be familiar with all controls and their proper operation. Know how to stop the machine and disengage them quickly.
- Never allow children under 16 years old to operate this machine. Children 16 years old and over should read and understand the operation instructions and safety rules in this manual and should be trained and supervised by a parent.
- 4. Never allow adults to operate this machine without proper instruction.
- 5. Keep bystanders, helpers, pets, and children at least 75 feet from the machine while it is in operation. Stop machine if anyone enters the area.
- 6. Never run an engine indoors or in a poorly ventilated area. Engine exhaust contains carbon monoxide, an odorless and deadly gas.
- 7. Do not put hands and feet near rotating parts or in the feeding chambers and discharge opening. Contact with the rotating impeller can amputate fingers, hands, and feet.
- 8. Never attempt to unclog either the feed intake or discharge opening, remove or empty bag, or inspect and repair the machine while the engine is running. Shut the engine off and wait until all moving parts have come to a complete stop. Disconnect the spark plug wire and ground it against the engine.

## Preparation

- 1. Thoroughly inspect the area where the equipment is to be used. Remove all rocks, bottles, cans, or other foreign objects which could be picked up or thrown and cause personal injury or damage to the machine.
- Always wear safety glasses or safety goggles during operation or while performing an adjustment or repair, to protect eyes. Thrown objects which ricochet can cause serious injury to the eyes.
- 3. Wear sturdy, rough-soled work shoes and close-fitting slacks and shirts. Loose fitting clothes or jewelry can be caught in movable parts. Never operate this machine in bare feet or sandals. Wear leather work gloves when feeding material in the chipper chute.
- 4. Before starting, check all bolts and screws for proper tightness to be sure the machine is in safe working condition. Also, visually inspect machine for any damage at frequent intervals.
- 5. Maintain or replace safety and instructions labels, as necessary.
- 6. To avoid personal injury or property damage use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive. Serious personal injury can occur when gasoline is spilled on yourself or your clothes which can ignite. Wash your skin and change clothes immediately.
  - a. Use only an approved gasoline container.
  - b. Extinguish all cigarettes, cigars, pipes, and other sources of ignition.
  - c. Never fuel machine indoors.
  - d. Never remove gas cap or add fuel while the engine is hot or running.
  - e. Allow engine to cool at least two minutes before refueling.
  - f. Never over fill fuel tank. Fill tank to no more than 1/2 inch below bottom of filler neck to provide space for fuel expansion.
  - g. Replace gasoline cap and tighten securely.
  - h. If gasoline is spilled, wipe it off the engine and equipment. Move machine to another area. Wait 5 minutes before starting the engine.
  - i. Never store the machine or fuel container inside where there is an open flame, spark, or pilot light (e.g. furnace, water heater, space heater, clothes dryer, etc.)
  - j. To reduce a fire hazard, keep machine free of grass, leaves, or other debris build-up. Clean up oil or fuel spillage and remove any fuel soaked debris.
  - k. Allow machine to cool at least 5 minutes before storing.

## Operation

- 1. Do not put hands and feet near rotating parts or in the feeding chambers and discharge opening. Contact with the rotating impeller can amputate fingers, hands, and feet.
- Before starting the machine, make sure the chipper chute, feed intake, and cutting chamber are empty and free of all debris.
- Thoroughly inspect all material to be shredded and remove any metal, rocks, bottles, cans, or other foreign objects which could cause personal injury or damage to the machine.
- f it becomes necessary to push material through the shredder hopper, use a small diameter stick. Do not use your hands or feet.
- 15. f the impeller strikes a foreign object or if your machine should start making an unusual noise or vibration, immediately shut the engine off. Allow the impeller to come to a complete stop. Disconnect the spark plug wire, ground it against the engine and perform the following steps: a. Inspect for damage.
  - b. Repair or replace any damaged parts.
  - c. Check for any loose parts and tighten to assure continued safe operation.
- Do not allow an accumulation of processed material to build up in the discharge area. This can prevent proper discharge and result in kickback of material through the feed opening.
- Do not attempt to shred or chip material larger than specified on the machine or in this manual. Personal injury or machine damage could result.
- Never attempt to unclog either the feed intake or discharge opening while the engine is running. Shut the engine off, wait until all moving parts have stopped, disconnect the spark plug wire and ground it against the engine before clearing debris.
- Never operate without the shredder hopper, chipper chute, or chute deflector properly attached to the machine. Never empty or change discharge bag while the engine is running.
- 10. Keep all guards, deflectors and safety devices in place and operating properly.
- Keep your face and body back and to the side of the chipper chute while feeding material into the machine to avoid accidental kickback injuries.
- 12. Never operate this machine without good visibility or light.
- 13. Do not operate this machine on a paved, gravel or non-level surface.
- 14. Do not operate this machine while under the influence of alcohol or drugs.
- 15. Muffler and engine become hot and can cause a burn. Do not touch.
- 16. Never pick up or carry machine while the engine is running.

## Maintenance & Storage

- 1. Never tamper with safety devices. Check their proper operation regularly.
- Check bolts and screws for proper tightness at frequent intervals to keep the machine in safe working condition. Also, visually inspect machine for any damage and repair, if needed.
- 3. Before cleaning, repairing, or inspecting, stop the engine and make certain the impeller and all moving parts have stopped. Disconnect the spark plug wire and ground it against the engine to prevent unintended starting.
- Do not change the engine governor settings or overspeed the engine. The governor controls the maximum safe operating speed of the engine.
- 5. Maintain or replace safety and instruction labels, as necessary.
- 6. Follow this manual for safe loading, unloading, transporting, and storage of this machine.
- 7. Never store the machine or fuel container inside where there is an open flame, spark or pilot light such as a water heater, furnace, clothes dryer, etc.
- 8. Always refer to the operator's manual for proper instructions on off-season storage.
- 9. If the fuel tank has to be drained, do this outdoors.
- 10. Observe proper disposal laws and regulations for gas, oil, etc. to protect the environment.

#### Do not modify engine

To avoid serious injury or death, do not modify engine in any way. Tampering with the governor setting can lead to a runaway engine and cause it to operate at unsafe speeds. Never tamper with factory setting of engine governor.

#### Notice regarding Emissions

Engines which are certified to comply with California and federal EPA emission regulations for SORE (Small Off Road Equipment) are certified to operate on regular unleaded gasoline, and may include the following emission control systems: Engine Modification (EM) and Three Way Catalyst (TWC) if so equipped.

#### Your Responsibility

Restrict the use of this power machine to persons who read, understand and follow the warnings and instructions in this manual and on the machine.

# Safe Operation Practices

## WARNING

This symbol points out important safety instructions, which if not followed, could endanger the personal safety and/or property of yourself and others. Read and follow all instructions in this manual before attempting to operate this machine. Failure to comply with these instructions may result in personal injury. When you see this symbol. **HEED IT'S WARNING!** 

Your Responsibility Restrict the use of this power machine to persons who read, understand and follow the warnings and instructions in this manual and on the machine.

## **Setting Up** Your Chipper Shredder

## WARNING

Never operate the chipper shredder with the chipper chute in the raised position. Doing so may result in property damage or serious injury to the operator or bystanders.

IMPORTANT This unit is shipped without gasoline or oil in the engine. Be certain to service engine with gasoline and oil as instructed in the separate engine manual before operating your machine.

NOTE: All references in this manual to the left or right side of the chipper shredder is from the operating position only. Exceptions, if any, will be specified.

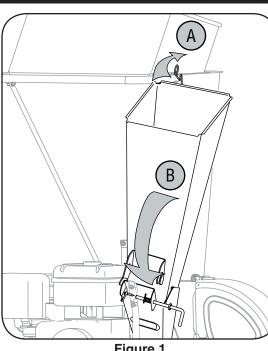

Figure 1

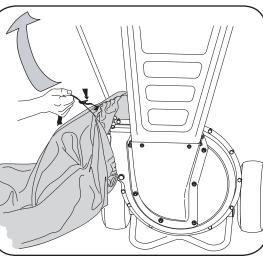

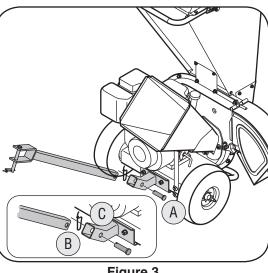

Figure 2

**IMPORTANT:** This unit is shipped without gasoline or oil in the engine. Be certain to service engine with gasoline and oil as instructed in the separate engine manual before operating your machine.

## Loose Parts In Carton

- a. Debris Collection Bag
- b. Tow Bar
- c. Safety Glasses
- d. Engine Oil

## Lowering The Chipper Chute (Model 24A-424G766 Only)

- 1. For shipping reasons, the unit is crated with its chipper chute in a raised position. To pivot it downward, proceed as follows:
  - a. Pull the spring latch upward.
  - b. Gently pivot the chipper chute down until it clicks into the lock rod. See Figure 1.

WARNING: Never operate the chipper shredder with the chipper chute in the raised position. Doing so may result in property damage or serious injury to the operator or bystanders.

## **Attaching The Debris Collection Bag**

- 2. To attach the bag:
  - a. Place the opening of the bag completely over the chute deflector.
  - b. Position the bag so that the wing knobs which secure the chute deflector to the impeller housing are completely covered.
  - c. Pull on the drawstrap until the bag is tight around chute deflector opening. See Figure 2.

## Attaching The Tow Bar

- 3. To attach the tow bar:
  - a. Remove the spring pin and clevis pin from the end of the tongue. See Figure 3.
  - b. Insert the tongue into the base.
  - c. Reinsert the clevis pin through aligning holes in both the tongue and the base. Fasten with the spring pin to secure. See Figure 3.

## **Know Your Chipper Shredder**

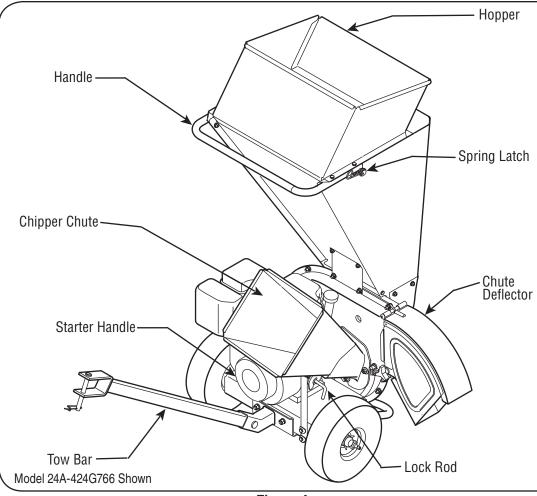

Figure 4

Now that you have set up your chipper shredder for operation, get aquainted with its controls and features. These are described below and illustrated on this page. This knowledge will allow you to use your new equipment to its fullest potential.

## **Chipper Chute**

Branches up to 3" in diameter may be fed into the chipper chute for chipping. See Figure 4.

#### Hopper

Leaves, twigs and branches up to 1/2-inch in diameter may be placed into the hopper for shredding. See Figure 4.

**IMPORTANT**: Never place branches with a diameter greater than 1/2-inch in the hopper. Doing so can result in serious damage to your unit's shredder blade, flails or impeller.

## **Spring Latch**

The spring latch is located on the top of the hopper. It is used to release or lock the chipper chute in a raised position for storage or for transporting. See Figure 4. WARNING: Never operate the chipper shredder with the chipper chute in the raised position. Use the spring latch to lower the chipper chute into the operating position before starting the engine.

## Lock Rod

The lock rod is located on the chipper chute support. It is used to release or lock the chipper chute in a lowered position for operation. See Figure 4.

#### **Tow Bar**

Use the tow bar to tow the chipper shredder behind a tractor to a job site. See Figure 4.

#### Handle

Use the handle when manually transporting the chipper shredder. See Figure 4.

#### **Starter Handle**

The starter handle is located on the engine. Pull the starter handle to start engine. See Figure 4.

#### **Engine Controls**

See the Briggs & Stratton Owner/Operator manual packed with your unit for the location and function of the controls on the engine.

## Setting Up Your Chipper Shredder

WARNING

Never operate the chipper shredder with the chipper chute in the raised position. Use the spring latch to lower the chipper chute into the operating position before starting the engine.

## IMPORTANT Never place branches with a diameter greater than 1/2-inch in the hopper. Doing so can result in serious damage to your unit's shredder blade, flails or impeller.

## Operating Your Chipper Shredder

WARNING

The operation of any chipper shredder can result in foreign objects being thrown. Always wear the safety glasses provided with this unit or eye shields before chipping or shredding and while performing any adjustments or repairs.

Never fill fuel tank indoors with engine running or until the engine has been allowed to cool for at least two minutes after running.

Never run the engine indoors or in a poorly ventilated area. Engine exhaust contains carbon monoxide, an odorless and deadly gas.

Never stop the engine by moving the choke lever into the CHOKE position. Backfire, fire or engine damage could result. WARNING: The operation of any chipper shredder can result in foreign objects being thrown into the eyes, which can damage your eyes severely. Always wear the safety glasses provided with this unit or eye shields before chipping or shredding and while performing any adjustments or repairs.

## Gas and Oil Fill-Up

Service the engine with gasoline and oil as instructed in the separate engine manual packed with your chipper shredder. Read instructions carefully.

WARNING: Never fill fuel tank indoors with engine running or until the engine has been allowed to cool for at least two minutes after running.

## **Starting Engine**

- 1. Attach spark plug wire to spark plug. Make certain the metal cap on the end of the spark plug is fastened securely over metal tip on the spark plug.
- 2. Open fuel shut-off valve (Model 424).
- 3. Move choke control lever to CHOKE position. See Figure 5.

**NOTE**: A warm engine may not require choking.

- Move throttle control lever to FAST (rabbit) position (Model 414) or push rocker switch to ON (Model 424). See Figure 5.
- 5. Grasp starter handle and pull rope out slowly until engine reaches start of compression cycle (rope will pull slightly harder at this point).

**NOTE**: A "clanking" noise may be heard when pulling the starter rope. It is completely normal and does NOT indicate a malfunction of any kind.

- 6. Pull rope with a rapid, continuous, full arm stroke. Keep a firm grip on starter handle. Let rope rewind slowly.
- 7. Repeat the previous steps until engine starts. When engine starts, move choke control gradually to RUN position until the engine is running smoothly.

WARNING: Never run the engine indoors or in a poorly ventilated area. Engine exhaust contains carbon monoxide, an odorless and deadly gas.

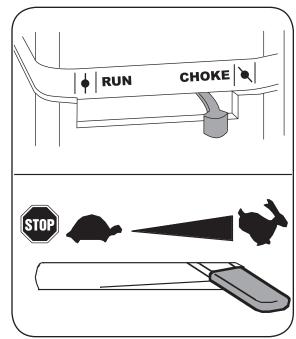

Figure 5

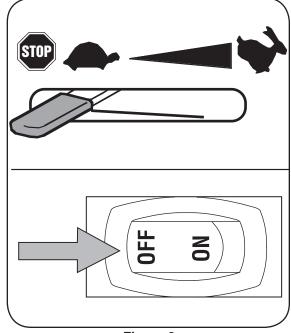

Figure 6

## Stopping Engine

1. Move throttle control lever to STOP position (Model 414) or push rocker switch to OFF (Model 424). See Figure 6.

**NOTE**: See your engine manual packed with your unit for more detailed instructions.

**CAUTION**: Never stop the engine by moving the choke lever into the CHOKE position. Backfire, fire or engine damage could result.

## **Operating The Chipper Shredder**

## Shredding

Yard waste such as leaves and pine needles can be placed in the hopper for shredding. After material has been processed by the shredder blade and flails, it will be forced out of the chute deflector, and, if attached, into a debris collection bag.

Observe the following guidelines when shredding yard debris:

- 1. Never attempt to shred material other than normal yard debris (leaves, twigs, pine cones, etc.).
- Avoid shredding fibrous plants such as tomato vines until they are thoroughly dried out. Fresh vines do not shred well and tend to wrap themselves around the impeller and flails.
- 3. Place reasonable amounts of debris into the hopper at a time. Do not overload the hopper.
- 4. Allow the material in the hopper to be drawn into the blades and shredded before adding additional debris to the hopper. Failure to due so may result in a clogged hopper, clogged chute deflector or a stalled engine.
- 5. Avoid placing twigs longer than 24 inches into the hopper. Twigs longer than 24 inches may result in a clogged hopper.
- Never place branches with a diameter greater than 1/2-inch in the hopper. Doing so can result in serious damage to the unit's shredder blade, flails or impeller.

## **Clearing the Hopper**

Should the hopper become clogged with debris during operation, proceed as follows:

1. Grasp the handle with both hands and gently agitate the chipper shredder to help loosen debris, drawing it into the impeller.

If the clog does not clear, proceed as follows:

- 1. Stop engine.
- 2. Use your hands to remove any debris found near the top of the hopper.
- 3. Use a branch (or other available device, i.e. broomstick) to dislodge debris located toward the base of the hopper.
- 4. Restart engine.

**NOTE**: If you're unable to pull the starter rope as a result of accumulated debris near the impeller, follow instructions under the heading **Cleaning the Reduction Chamber** in the "Maintaining Your Chipper Shredder" section of this manual.

### Chipping

WARNING: Never operate the chipper shredder without chipper chute lowered into the operating position.

Branches up to 3" in diameter can be fed into the chipper chute. Observe the following guidelines when chipping branches:

- 1. Keep both hands firmly on the branch as you feed it into the chipper chute.
- 2. Never feed more than one branch into the chipper chute at a time.
- 3. Never feed anything other than branches (or wood) into the chipper chute.
- 4. Apply intermittent pressure (force, in short pulses) while feeding larger (2- 3-inch diameter) branches into the chipper chute, to avoid bogging or stalling the engine.

**IMPORTANT**: Never feed branches with a diameter greater than three (3) inches into the chipper chute. Doing so can result in serious damage to your unit's chipper blades, flails or impeller.

**NOTE**: For best performance, always operate the unit with sharp chipper blades. If a noticeable loss in performance is encountered while chipping branches, the chipper blades should be replaced.

#### Emptying the Debris Collection Bag 1. Stop engine.

- 2. Squeeze the locking buckle release the bag's drawstrap before loosening it from the chute deflector. See Figure 7.
- 3. Empty the bag and reattach to the chute deflector opening. Refer to Figure 2.

Operating Your Chipper Shredder

WARNING

Never operate the chipper shredder without chipper chute lowered into the operating position.

## IMPORTANT

Never place branches with a diameter greater than 1/2-inch in the hopper. Doing so can result in serious damage to your unit's shredder blade, flails or impeller.

## IMPORTANT

Never feed branches with a diameter greater than three (3) inches into the chipper chute. Doing so can result in serious damage to your unit's chipper blades, flails or impeller.

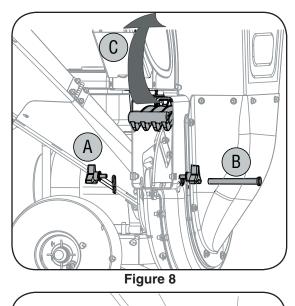

## Maintaining Your Chipper Shredder

## WARNING

Always stop engine, disconnect spark plug, and ground against engine before cleaning, lubricating or doing any kind of maintenance on your machine.

The impeller's chipper blades are sharp. Wear leather work gloves to protect your hands.

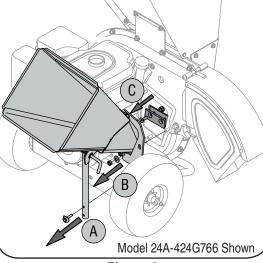

Figure 9 WARNING: Always stop engine, disconnect spark plug, and ground against engine before cleaning, lubricating or doing any kind of maintenance on your machine.

## Lubrication

- 1. Lubricate the chipper chute hinge a with light oil once a season.
- 2. Lubricate the pivot points on the chute deflector with light oil once a season.
- Refer to the Briggs & Stratton Owner/Operator manual packed with your unit for engine lubrication instructions.

### **Engine Care**

Refer to the Maintenance section of the Briggs & Stratton Owner/Operator manual packed with your unit. Read and follow instructions carefully.

- 1. Check **engine oil level** before each use as instructed in the separate engine manual.
- 2. Clean **air cleaner's precleaner** every 25 hours under normal conditions. Clean every few hours

under extremely dusty conditions. Replace the **air cleaner cartridge** once a season. To service the air cleaner, refer to the separate engine manual.

3. The **spark plug** should be cleaned and the gap reset once a season. Refer to the separate engine manual for correct plug type and gap specifications.

## **Chipper Shredder Care**

Before each use, visually inspect your chipper shredder for loose (or missing) nuts and bolts. Securely tighten (or replace) all hardware before operating the chipper shredder.

## **Cleaning The Reduction Chamber**

WARNING: The impeller's shredder blade and chipper blades are sharp. Wear leather work gloves to protect your hands when cleaning out the reduction chamber.

If the reduction chamber becomes clogged with debris, the shredder screen can be pivoted upward so that you can clean the surrounding area. To do so, proceed as follows:

1. Stop engine, disconnect spark plug, and make certain the chipper shredder has come to a complete stop.

WARNING: The muffler and surrounding area will be hot if the engine has been running. Use caution and protect your hands if working near the muffler.

- 2. a. If attached, remove debris bag. Remove the two wing knobs on either side of the chute deflector and pivot the chute deflector upward. See Figure 8.
  - Remove the hairpin clip from the clevis pin which extends through the housing and shredder screen.
     See Figure 8. Remove clevis pin.
  - c. Pivot the shredder screen upward and clean the surrounding area by scraping away debris.
- 3. Confirm that the spark plug wire is disconnected and away from spark plug. Pull on the starter rope two-to-three times to purge any remaining debris from the reduction chamber
- 4. When the area is cleaned, pivot the shredder screen downward and re-secure with the clevis pin and hairpin clip removed earlier.
- 5. Reattach the debris collection bag to the chute deflector, if desired.

## Sharpening Or Replacing Chipper Blades

#### WARNING: The impeller's chipper blades are sharp. Wear leather work gloves to protect your hands.

1. Stop engine, disconnect spark plug, and make certain the chipper shredder has come to a complete stop.

- 2. Pivot the shredder screen upward as instructed under the heading Cleaning the Reduction Chamber.
- 3. a. Remove the chipper chute support brace from the frame by removing the two hex bolts and saddle washers which secure it. See Figure 9.
  - b. Remove the chipper chute by removing three hex nuts and washers which secure it to the impeller housing. See Figure 9.
  - Rotate the impeller by hand until one of the two chipper blades is visible through the impeller housing opening.
  - c. Remove the blade by removing the internal hex screws, lock washers and hex nuts which secure it to the impeller. Retain the hardware.

**NOTE**: Use a 3/16" hex key (Allen) wrench on the outside of the blade and a 1/2" box (or socket) wrench on the inside of the impeller. Hold the Allen wrench stationary and rotate the box (or socket) wrench to loosen the nut.

4. Install a replacement blade (Part No. 742-0544) with the hardware removed earlier or sharpen.

**IMPORTANT**: When sharpening the blade, protect hands by using gloves. Follow the original angle of grind and make sure to remove an equal amount from each blade.

5. To replace the other blade, rotate the impeller to expose the second blade and repeat the steps above.

**NOTE**: Make certain blades are reassembled with the sharp edge outward (toward the chipper chute). Torque hardware to between 20 ft.-lbs and 25 ft.-lbs.

# Sharpening Or Replacing The Shredder Blade

WARNING: The shredder blade is sharp. Wear leather work gloves to protect vour hands.

- 1. Stop engine, disconnect spark plug, and make certain that all moving parts have come to a complete stop.
- 2. Remove the two flange nuts (and hex bolts) which secure the hopper support bracket to the impeller housing. Retain the hardware. See Figure 10.
- 3. Pivot the shredder screen upward as instructed under the heading **Cleaning the Reduction Chamber**.
- 4. a. Remove six flange nuts which secure hopper inlet guide to impeller housing. See Figure 11.
  - Carefully separate the hopper assembly from the impeller housing and set it aside.
  - Insert a piece of wood into the chute deflector opening to stabilize the impeller and prevent it from rotating when removing the shredder blade.
  - b. Remove the two internal hex screws, hex lock nuts, and lock washers which secure the shredder blade to the impeller. See Figure 11.

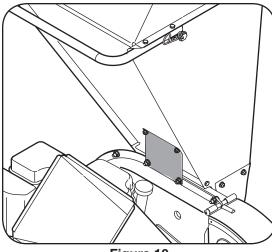

Figure 10

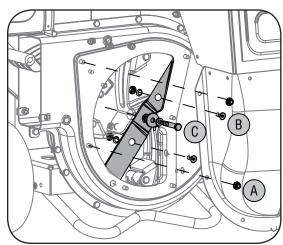

Figure 11

**NOTE**: Use a 3/16" hex key (Allen) wrench on the outside of the shredder blade and a 1/2" box (or socket) wrench on the inside of the shredder blade. Hold the Allen wrench stationary and rotate the box (or socket) wrench to loosen the nut.

c. Remove the hex bolt, lock washer, and flat washer to completely free shredder blade. See Figure 11.

**IMPORTANT**: If sharpening the blade for reuse, follow the original angle of grind as a guide. Make certain each cutting edge receives an equal amount of grinding to prevent an unbalanced blade. Remove metal from the heavy side until it is balanced evenly.

**IMPORTANT**: When reassembling the blade, tighten center bolt to between 45 ft.-lbs and 60 ft.-lbs and the two out bolts to between 20 ft.-lbs and 25 ft.-lbs.

## Storing Your Chipper Shredder

- 1. Clean the equipment thoroughly.
- 2. Wipe equipment with an oiled rag to prevent rust.
- 3. Refer to engine manual for correct engine storage instructions
- 4. Store unit in a clean, dry area. Do not store next to corrosive materials such as fertilizer.

## Maintaining Your Chipper Shredder

WARNING

The shredder blade is sharp. Wear leather work gloves to protect your hands.

### IMPORTANT

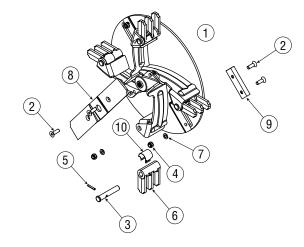

Make certain chipper blades are reassembled with the sharp edge outward (toward the chipper chute). Torque hardware to between 20 ft.-lbs and 25 ft.-lbs.

## IMPORTANT

When reassembling the shredder blade, tighten center bolt to between 45 ft.-lbs and 60 ft.-lbs and the two out bolts to between 20 ft.-lbs and 25 ft.-lbs.

$\bigcirc$	Problem	Cause	Remedy

## MANUFACTURER'S LIMITED WARRANTY FOR

d.

f.

The limited warranty set forth below is given by Troy-Bilt LLC with respect to new merchandise purchased and used in the United States and/or its territories and possessions, and by MTD Products Limited with respect to new merchandise purchased and used in Canada and/or its territories and possessions (either entity respectively, "Troy-Bilt").

"Troy-Bilt" warrants this product (excluding its normal wear parts as described below) against defects in material and workmanship for a period of two (2) years commencing on the date of original purchase and will, at its option, repair or replace, free of charge, any part found to be defective in materials or workmanship. This limited warranty shall only apply if this product has been operated and maintained in accordance with the Operator's Manual furnished with the product, and has not been subject to misuse, abuse, commercial use, neglect, accident, improper maintenance, alteration, vandalism, theft, fire, water, or damage because of other peril or natural disaster. Damage resulting from the installation or use of any part, accessory or attachment not approved by Troy-Bilt for use with the product(s) covered by this manual will void your warranty as to any resulting damage.

Normal wear parts are warranted to be free from defects in material and workmanship for a period of thirty (30) days from the date of purchase. Normal wear parts include, but are not limited to items such as: batteries, belts, blades, blade adapters, grass bags, rider deck wheels, seats, snow thrower skid shoes, friction wheels, shave plates, auger spiral rubber and tires.

**HOW TO OBTAIN SERVICE:** Warranty service is available, WITH PROOF OF PURCHASE, through your local authorized service dealer. To locate the dealer in your area:

#### In the U.S.A.

Check your Yellow Pages, or contact Troy-Bilt LLC at P.O. Box 361131, Cleveland, Ohio 44136-0019, or call 1-866-840-6483 or 1-330-558-7220, or log on to our Web site at www.troybilt.com.

#### In Canada

Contact MTD Products Limited, Kitchener, ON N2G 4J1, or call 1-800-668-1238 or log on to our Web site at www.mtdcanada.com.

This limited warranty does not provide coverage in the following cases:

- a. The engine or component parts thereof. These items may carry a separate manufacturer's warranty. Refer to applicable manufacturer's warranty for terms and conditions.
- b. Log splitter pumps, valves, and cylinders have a separate one- year warranty.
- Routine maintenance items such as lubricants, filters, blade sharpening, tune-ups, brake adjustments, clutch adjustments,

deck adjustments, and normal deterioration of the exterior finish due to use or exposure.

- Service completed by someone other than an authorized service dealer.
- e. Troy-Bilt does not extend any warranty for products sold or exported outside of the United States and/or Canada, and their respective possessions and territories, except those sold through Troy-Bilt's authorized channels of export distribution.
  - Replacement parts that are not genuine Troy-Bilt parts.
- g. Transportation charges and service calls.
   h If Products are used commercially. (Trov-B)
  - If Products are used commercially. (Troy-Bilt may separately offer Limited Commercial Warranties on certain select products. Ask your dealer or retailer for details or contact Troy-Bilt Service for more information).

No implied warranty, including any implied warranty of merchantability of fitness for a particular purpose, applies after the applicable period of express written warranty above as to the parts as identified. No other express warranty, whether written or oral, except as mentioned above, given by any person or entity, including a dealer or retailer, with respect to any product, shall bind Troy-Bilt. During the period of the warranty, the exclusive remedy is repair or replacement of the product as set forth above.

The provisions as set forth in this warranty provide the sole and exclusive remedy arising from the sale. Troy-Bilt shall not be liable for incidental or consequential loss or damage including, without limitation, expenses incurred for substitute or replacement lawn care services or for rental expenses to temporarily replace a warranted product.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above exclusions or limitations may not apply to you.

In no event shall recovery of any kind be greater than the amount of the purchase price of the product sold. **Alteration of safety features of the product shall void this warranty.** You assume the risk and liability for loss, damage, or injury to you and your property and/or to others and their property arising out of the misuse or inability to use the product.

This limited warranty shall not extend to anyone other than the original purchaser or to the person for whom it was purchased as a gift.

**HOW STATE LAW RELATES TO THIS WARRANTY:** This limited warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

**IMPORTANT:** Owner must present Original Proof of Purchase to obtain warranty coverage.
