## Notational

**Note**

These safety instructions must be followed to ensure your safety and prevent property damage.

Make sure to read the instructions carefully and use the product in the correct manner.

### **Warning / Caution**

Failure to follow directions noted by this symbol could result in bodily harm or damage to the equipment.

### **Notational Conventions**

Prohibited

Important to read and understand at all times

Do not disassemble

Disconnect the plug from the outlet

Do not touch

Ground to prevent an electric shock

## Power

When not used for extended period of time, set your computer to DPM.

If using screen saver, set it to active screen mode.

The images here are for reference only, and are not applicable in all cases (or countries).

Shortcut to Anti-Afterimage Instructions

 Do not use a damaged power cord or plug or a damaged or loose power outlet.

- Otherwise, this may result in electric shock or fire.

 Do not touch the power plug with wet hands when removing or plugging the plug into the outlet.

- Otherwise, this may result in electric shock.

 Make sure to connect the power cord to a grounded power outlet.

- Otherwise, it may result in electric shock or personal injury.

▶ Ensure that the power plug is plugged into the power outlet firmly and correctly.

- Otherwise, this may result in fire.

▶ Do not forcefully bend or pull the power plug and do not place any heavy material on it.

- Otherwise, this may result in fire.

▶ Do not connect multiple appliances to the same power outlet.

- Otherwise, this may cause fire due to overheating.

▶ Do not disconnect the power cord while using the product.

- Otherwise, this may result in damage to the product due to electric shock.

▶ To disconnect the apparatus from the mains, the plug must be pulled out from the mains socket, therefore the mains plug shall be readily operable.

- This may cause electric shock or fire.

▶ Use only the power cord provided by our company. Do not use the provided power cord of another product.

- Otherwise, this may result in fire or electric shock.

## Installation

Be sure to contact an authorized Service Center when installing your LCD Monitor in a location with heavy dust, high or low temperatures, high humidity, and exposed to chemical substances and where it operates for 24 hours such as at airports, train stations etc.

Failure to do so may cause serious damage to your LCD Monitor.

▶ Ensure that at least two persons lift and move the product.

- Otherwise, it may be dropped and cause personal injury, and/or damage the product.

▶ When installing the product in a cabinet or rack, make sure that the front end of the bottom of the product does not project out.

- Otherwise, it may fall or cause personal injury.

• Use a cabinet or rack of a size appropriate to the product.

▶ DO NOT PLACE CANDLES, MOSQUITO REPELLANT, CIGARETTES AND ANY HEATING APPLIANCES NEAR THE PRODUCT.

- Otherwise, this may result in fire.

- ▶ Keep heating appliances as far away from the power cord or the product as possible.
- Otherwise, this may result in electric shock or fire.

- ▶ Do not install it in a badly ventilated location such as a bookcase or closet.
- Otherwise, this may result in fire due to an increase in the internal temperature.

- ▶ When putting the product down, make sure to put it down softly.
- Otherwise, this may result in damage to the screen display.

- ▶ Do not place the front of the product on the floor.
- Otherwise, this may result in damage to the screen display.

- ▶ Ensure that an authorized installation company installs the wall mount.
- Otherwise, it may fall and cause personal injury.
- Make sure to install the specified wall mount.

- ▶ Install your product in a well ventilated location. Ensure that there is a clearance of more than 10 cm from the wall.
- Otherwise, it may result in fire due to an increase in the internal temperature.

- ▶ Ensure that the packaging vinyl is kept away from children.
- Otherwise, it may result in serious harm (suffocation) if children play with it.

- ▶ If the height of your LCD Monitor is adjustable, do not place any object or part of your body on the stand when lowering it.
- This may cause damage to the product or the person carrying it.

## Clean

When cleaning the LCD Monitor case or the surface of the TFT-LCD screen, wipe with a slightly moistened, soft fabric.

- ▶ Do not spray cleaner directly onto the surface of the product.
- Otherwise, this may result in the discoloration and distortion of the structure and the screen surface may peel off.

- ▶ Clean the product using a soft cloth with a LCD Monitor cleaner only. If you must use a cleaner other than the LCD Monitor cleaner, dilute it with water at a ratio of 1:10.

▶ When cleaning the power plug pins or dusting the power outlet, clean it with a dry cloth.

- Otherwise, it may result in fire.

▶ When cleaning the product, make sure to disconnect the power cord.

- Otherwise, it may result in electric shock or fire.

▶ When cleaning the product, disconnect the power cord and clean it softly with a dry cloth.

- (Do not use chemicals such as wax, benzene, alcohol, thinner, mosquito repellent, lubricant, or cleaner.) These may change the appearance of the product surface and peel off the indication labels on the product.

▶ Since the product housing is easily scratched, make sure to use the specified cloth only.

- Use the specified cloth adding only a little water. As the product may be scratched if there is any foreign material on the cloth, make sure to shake it thoroughly before using it.

▶ When cleaning the product, do not spray water directly onto the main body of the product.

- Ensure that water does not enter the product and that it is not wet.
- Otherwise, this may result in electric shock, fire or a malfunction.

## Others

▶ The product is a high voltage product. Ensure that users do not disassemble, repair or modify the product themselves.

- Otherwise, this may result in electric shock or fire. If the product needs to be repaired, contact a Service Center.

▶ If there is a strange smell or a strange sound or smoke is coming from the product, disconnect the power plug immediately and contact a Service Center.

- Otherwise, this may result in electric shock or fire.

▶ Do not place this product in a location exposed to moisture, dust, smoke, water, or in a car.

- Otherwise, this may result in electric shock or fire.

▶ When you drop the product or the case is broken, turn the power off and disconnect the power cord. Contact a Service Center.

- Otherwise, this may result in electric shock or fire.

▶ If thunder or lightening is occurring, do not touch the power cord or antenna cable.

- Otherwise, this may result in electric shock or fire.

▶ Do not try to move the LCD Monitor by pulling only the wire or the signal cable.

- Otherwise, it may fall and result in electric shock, damage to the product or fire due to damage to the cable.

▶ Do not lift or move the product back and forwards or right and left while only holding the power cord or signal cables.

- Otherwise, it may fall and result in electric shock, damage to the product or fire due to damage to the cable.

▶ Make sure that the ventilating opening is not blocked by a table or curtain.

- Otherwise, it may result in fire due to an increase in the internal temperature.

▶ Do not place any containers containing water, vases, flower-pots, medicines as well as any metal on the product.

- If water or a foreign material enters the product, disconnect the power cord and contact a Service Center.

- This may result in a product malfunction, electric shock, or fire.

▶ Do not use or keep combustible spray or flammable material near the product.

- Otherwise, this may result in an explosion or fire.

▶ Do not insert any metal, such as chopsticks, coins, pins and steel, or flammable objects, such as matches or paper, inside the product (through the ventilating openings, input and output terminals, etc).

- If water or foreign material enters the product, disconnect the power cord and contact a Service Center.

- Otherwise, this may result in electric shock or fire.

▶ When using a fixed screen for a long time, an afterimage or stain may occur.

- If you are not using your product for a long period of time, put it into sleep mode or use a moving screen saver.

▶ Set a resolution and frequency appropriate to the product.

- Otherwise, your eyesight may be damaged.

▶ When using headphones or earphones, do not turn the volume too high.

- Having the sound too loud may damage your hearing.

▶ If you continually move closer to the product screen, your eyesight may be failing.

▶ Take a rest for at least five (5) minutes after using the LCD Monitor for one (1) hour.

This reduces the weariness of your eyes.

▶ Do not install it in an unstable location such as an unstable rack or uneven surface or a location exposed to vibrations.

- Otherwise, it may fall and cause personal injury and/or damage the product.
- If you use the product in a location exposed to vibrations, it may damage the product and result in fire.

▶ When moving the product, turn the power off and disconnect the power plug, antenna cable, and all the cables connected to the product.

- Otherwise, it may result in electric shock or fire.

▶ Ensure that children do not hang onto the product or climb up onto the product.

- The product may fall and cause personal injury or death.

▶ If you do not use the product for a long period of time, disconnect the power cord from the power outlet.

- Otherwise, this may result in overheating or fire due to dust, and may result in fire due to electric shock or leakage.

▶ Do not place any heavy items or toys or confectionery, such as cookies etc. that may attract the attention of children and to the product.

- Your children may hang onto the product causing it to fall and this may result in personal injury or death.

▶ Be careful that children do not place the battery in their mouths when removed from the remote control. Place the battery in a location that children or infants cannot reach.

- If children have had the battery in their mouths, consult your doctor immediately.

▶ When replacing the battery, insert it with right polarity (+, -).

- Otherwise, the battery may become damaged or it may cause fire, personal injury or damage due to leakage of the internal liquid.

▶ Use only the specified standardized batteries, and do not use a new battery and a used battery at the same time.

- Otherwise, the batteries may be damaged or cause fire, personal injury or damage due to a leakage of the internal liquid.

▶ The batteries (and rechargeable batteries) are not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling.

- The customer can return used or rechargeable batteries to a nearby public recycling center or to a store selling the same type of the battery or rechargeable battery.

▶ Do not place the product in a location exposed to direct sunlight or near any heat such as a fire or heater.

- This may reduce the lifetime of the product, and may result in fire.

▶ Do not drop any objects onto the product or cause any impact to the product.

- Otherwise, this may result in electric shock or fire.

▶ Do not use a humidifier or kitchen table near the product.

- Otherwise, this may result in electric shock or fire.

▶ When there is a gas leak, do not touch the product or the power plug but ventilate immediately.

- If a spark occurs, it may cause an explosion or fire.

▶ If the product has been turned on for a long time, the display panel becomes hot. Do not touch it.

- Keep the small accessories in a location out of the reach of children.

▶ Be careful when adjusting the angle of the product or the height of the stand.

- This may result in personal injury as your hand or fingers may become caught.

- Also, if you tilt the product too far, it may fall and cause personal injury.

▶ Do not install the product in a location low enough for children to reach.

- Otherwise, it may fall and result in personal injury.

- Since the front part of the product is heavy, install the product on a level and stable surface.

▶ Do not put any heavy objects on the product.

- This may result in personal injury and/or damage to the product.

## Mechanical Layout

## LCD Monitor Head

## Installation VESA Bracket

- When installing VESA, make sure to comply with the international VESA standards.
- Purchasing VESA Bracket and Installation Information : Please contact your nearest SAMSUNG Distributor to place an order. After your order is placed, installation professionals will visit you and install the bracket.
- At least 2 persons are needed in order to move the LCD Monitor.
- SAMSUNG is not responsible for any product damage or any injury caused by installation at customer's discretion.

## Dimensions

### Notice

For securing the bracket on a wall, use only machine screws of 6 mm diameter and 8 to 12 mm length.

## Wall Bracket Installation

- Contact a technician for installing the wall bracket.
- SAMSUNG Electronics is not responsible for any damages to the product or harm to customers when the installation is done by the customer.
- This product is for installing on cement walls. The product may not stay in place when installed on plaster or wood.

## Components

Only use the components and accessories shipped with the product.

Wall Bracket(1)

Hinge(Left 1, Right 1)  
Plastic Hanger (4)

Screw (A)(11)

Screw (B)(4)

Anchor (11)

## Wall Bracket Assembly

### Note

There are two hinges(left and right). Use the correct one.

1. Insert and tighten the Captive Screw in the direction of the arrow.

When done, mount the wall bracket on the wall.

There are two hinges(left and right). Use the correct one.

- A - Captive Screw
- B - Wall Bracket
- C - Hinge (Left)
- D - Hinge (Right)

2. Before drilling into the wall, check if the length between the two locking holes at the back of the product is correct.

If the length is too short or long, loosen all or some of the 4screws on the wall bracket to adjust the length.

- A - Length between the two locking holes

3. Check the installation diagram and mark the drill points on the wall. Use the 5.0 mm bit to drill holes deeper than 35 mm. Fix each anchor in the corresponding hole. Match each of the brackets and hinge holes to the corresponding anchor holes and insert and tighten the 11 screws A.

### To mount the product on the wall bracket

The shape of the product may vary depending on the model. (The assemblies of the plastic hanger and the screw are the same)

1. Remove the 4 screws on the back of the product.

2. Insert the screw B into the plastic hanger.

 **Notice**

- Mount the product on the wall bracket and make sure it is properly fixed to the left and right plastic hangers.
  - Be careful when installing the product on the bracket as fingers can be caught in the holes.
  - Make sure the wall bracket is securely fixed to the wall, or the product may not stay in place after installation.
3. Tighten the 4 screws in step 2 (plastic hanger + screw B) to the rear holes of the product.

4. Remove safety pin (3) and insert the 4 product holders into the corresponding bracket holes (1). Then place the product(2) so that it is firmly fixed to the bracket. Make sure to re-insert and tighten the safety pin (3) to securely hold the product to the bracket.

- A - LCD Monitor
- B - Wall Bracket
- C - Wall

### Wall Bracket Angle Adjustment

Adjust the bracket angle to  $-2^{\circ}$  before installing it on the wall.

1. Fix the product to the wall bracket.
2. Hold the product at the top in the center and pull it forward (direction of the arrow) to adjust the angle.

#### Note

You can adjust the bracket angle between  $-2^{\circ}$  and  $15^{\circ}$ .

Make sure to use the top center, and not the left or the right side of the product to adjust the angle.

# Connections

## Connecting a Computer

### Using a Power cord with Earth

- In the event of failure, the earth lead may cause electric shock. Make sure to wire the earth lead in correctly, before connecting the AC power. When un-wiring the earth lead, make sure to disconnect the AC power in advance.

### Note

AV input devices such as DVD players, VCRs or camcorders as well as your computer can be connected to the LCD Monitor. For detailed information on connecting AV input devices, refer to the contents under Adjusting Your LCD Monitor.

- 1 Connect the power cord for your LCD Monitor to the power port on the back of the LCD Monitor. Turn on the power switch.
- 2 There are 2 ways to connect the D-sub to your LCD Monitor. Choose one of the following:

**2-1** Using the D-sub (Analog) connector on the video card.

- Connect the D-sub to the 15-pin, RGB port on the back of your LCD Monitor and the 15 pin D-sub Port on the computer.

**2-2** Using the DVI (Digital) connector on the video card.

- Connect the DVI Cable to the DVI port on the back of your LCD Monitor and the DVI port on the computer.

- 3 Connect the audio cable for your LCD Monitor to the audio port on the back of your computer.

**Note**

- Turn on both your computer and the LCD Monitor.
- The DVI / D-sub cable is optional.
- Contact a local SAMSUNG Electronics [Service Center](#) to buy optional items.

### Connecting to Other devices

#### Using a Power cord with Earth

In the event of failure, the earth lead may cause electric shock. Make sure to wire the earth lead in correctly, before connecting the AC power. When un-wiring the earth lead, make sure to disconnect the AC power in advance.

**Note**

AV input devices such as DVD players, VCRs or camcorders as well as your computer can be connected to the LCD Monitor. For detailed information on connecting AV input devices, refer to the contents under Adjusting Your LCD Monitor.

### Connecting AV Devices

1. Connect the port of the DVD, VCR (DVD / DTV Set-Top Box) to the [R-AUDIO-L] port of the LCD Monitor.
2. Then, start the DVD, VCR or Camcorders with a DVD disc or tape inserted.
3. Select **AV** using the SOURCE .

**Note**

The LCD Monitor has AV connection terminals to connect AV input devices like DVDs, VCRs or Camcorders. You may enjoy AV signals as long as the LCD Monitor is turned on.

## Connecting to a Camcorder

1. Locate the AV output jacks on the camcorder. They are usually found on the side or back of the camcorder. Connect a set of audio cables between the AUDIO OUTPUT jacks on the camcorder and the AV AUDIO IN [L-AUDIO-R] on the LCD Monitor.
2. Connect a video cable between the VIDEO OUTPUT jack on the camcorder and the AV IN [VIDEO] on the LCD Monitor .
3. Select **AV** for the Camcorder connection using the Source button on the front of the LCD Monitor or on the remote control.
4. Then, start the Camcorders with a tape inserted.

 **Note**

The audio-video cables shown here are usually included with a Camcorder. (If not, check your local electronics store.) If your camcorder is stereo, you need to connect a set of two cables.

## Connecting Using a HDMI Cable

 **Note**

- Input devices such as digital DVD are connected to the HDMI terminal of the LCD Monitor using the HDMI cable.
- You cannot connect a PC to the HDMI terminal.

## Connecting Using a DVI to HDMI Cable

 **Note**

- Connect the DVI output terminal of a digital output device to the HDMI terminal of the LCD Monitor using a DVI to HDMI cable.
- Connect the red and white jacks of an RCA to stereo (for PC) cable to the same colored audio output terminals of the digital output device, and connect the opposite jack to the DVI / PC / HDMI AUDIO IN terminal of the LCD Monitor.

## Connecting to an Audio System

 **Note**

- Connect a set of audio cables between the AUX L, R jacks on the AUDIO SYSTEM and AUDIO OUT [L-AUDIO-R] on LCD Monitor.

Multiple Display Control

# MDC System

## Introduction

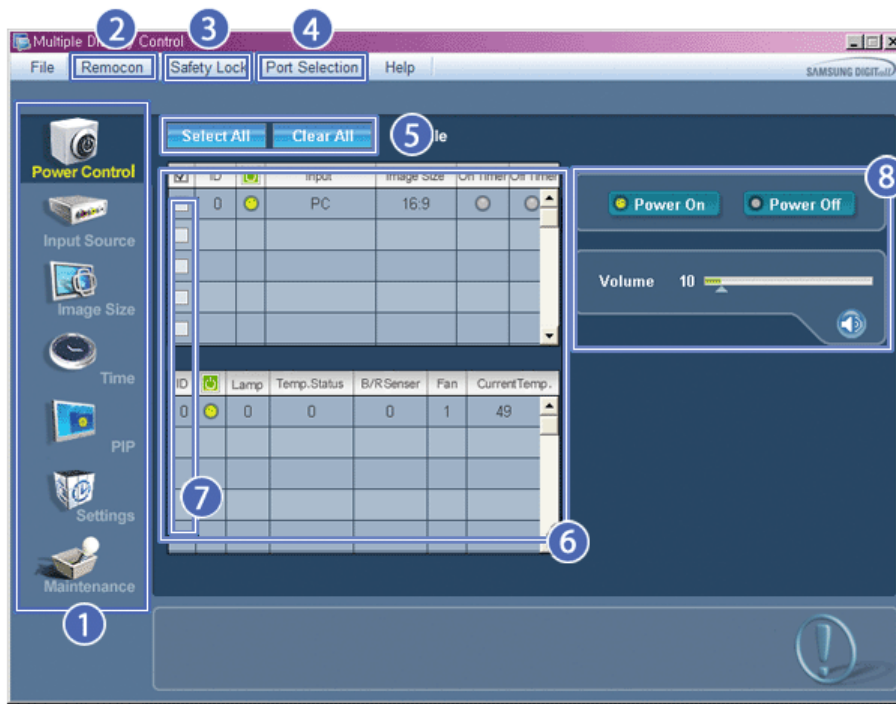

A Multiple Display Control (MDC) is an application allowing various monitors to be easily and simultaneously operated on a PC. RS-232C, a standard of serial communication, is used for the communication between a PC and a Monitor. Therefore, a serial cable should be connected between the serial port on a PC and the serial port on a Monitor.

## Main Screen

Click Start > Program > Samsung > MDC System to start the program.

Select a set to see the volume of the selected set within the slider.

- |                  |                     |
|------------------|---------------------|
| ① Main Icons     | ⑤ Select Button     |
| ② Remocon        | ⑥ Info Grid         |
| ③ Safety Lock    | ⑦ Monitor Selection |
| ④ Port Selection | ⑧ Control Tools     |

- Use the main icons to switch into each screen.
- Allows you to enable or disable the remote control signal receiving function of the monitor unit.
- Set the Safety Lock function.  
When setting the Lock function, you can only operate power and lock buttons on the remote control and set.
- The setting for the PC Serial Port can change. The original value is COM1.
- Click Select all or Clear to select or clear all monitors.
- Use Grid to view brief information on selected monitor.
- Select a monitor from Monitor Selection.
- Use Control Tools to control monitors.

<Note> The remote control Enable/Disable function operates whether or not the power is On/Off, and this applies to all monitors connected to the MDC. However, regardless of the status at the time the MDC is shut down, the remote control signal receiving function of all monitors is initialized to Enable when the MDC is closed.

## Port Selection

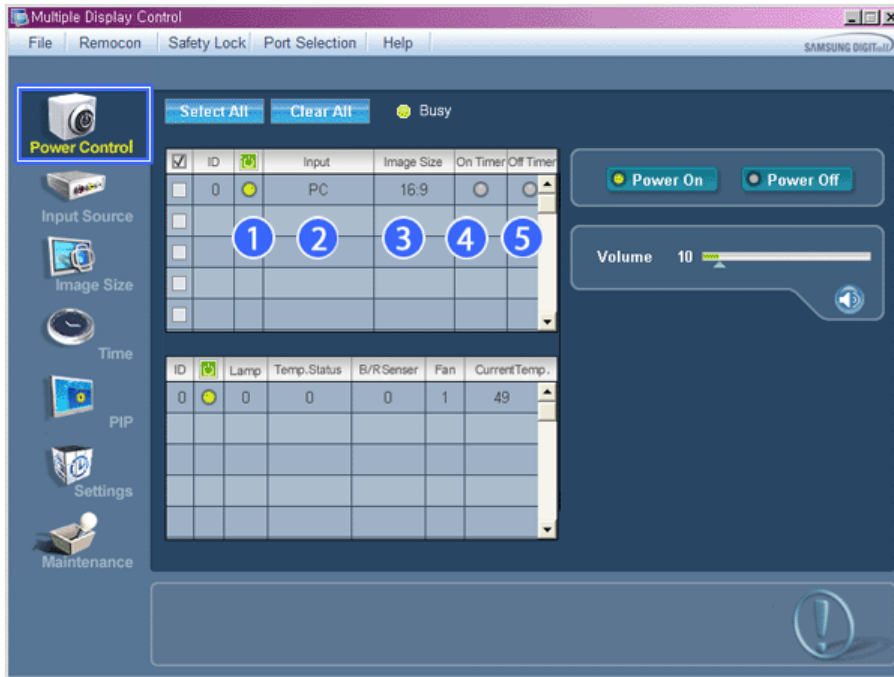

1. The Multiple Display Control is originally set to COM1.
2. If any port other than COM1 is used, COM1 through COM4 can be selected in the Port Selection Menu.
3. If the exact port name that is connected to the LCD Monitor using a serial cable is not selected, communication will be unavailable.
4. The selected port is stored in the program and used for the next program as well.

## Troubleshooting

1. The monitor you wish to control does not appear on the Power Control Info Grid
    - Check the connection of RS232C. (Check if it is properly connected to the Com1 port)
    - Check the monitors to see if any of the other monitors connected have the same ID. If more than one monitors have the same ID, those monitors are not properly detected by the program due to data conflict.
    - Check if the Monitor Set ID is a number between 0 and 25. (Adjust using the Display menu)

Note : A Monitor Set ID must be a value between 0 and 25 .
  2. The monitor you wish to control does not appear on the other Control Info Grids
    - Check to see if the monitor power is ON. (You can check this in Power Control Info Grid)
    - Check if you can change the input source of the monitor.
  3. The dialogue box appears repeatedly.
    - Check to see if the monitor you wish to control is selected.
  4. Both On Timer and Off Timer have been set but different time is showing.
    - Apply current time to synchronize the monitor clocks.
  5. The remote may not function properly when you turn off the remote Function, disconnect the RS-232C cable, or exit the program in an Irregular manner. Rerun the program and turn the remote function again to Restore normal functions.
- < Note > This program may malfunction due to problems in communication circuits or interference from electronic appliances nearby.

# Troubleshooting

## Self-Test Feature Check

Check the following items yourself before calling for assistance. Contact a Service Center for problems that you cannot solve by yourself.

## Self-Test Feature Check

1. Turn off both your computer and the LCD Monitor.
2. Unplug the video cable from the back of the computer.
3. Turn on the LCD Monitor.

The figure shown below ("**Check Signal Cable**") appears on a black background when the LCD Monitor is working normally even though no video signal is detected: While in the Self-Test mode, the LED power indicator remains green and the figure moves around on the screen.

4. Turn off your LCD Monitor and reconnect the video cable; then turn on both your computer and the LCD Monitor.

If your LCD Monitor screen remains blank after using the previous procedure, check your video controller and computer system; your LCD Monitor is functioning properly.

## Warning Messages

You can even view the screen above the resolution of 1920 x 1080. However, you will receive the following message for a minute; You can choose to change the screen resolution or stay in the current mode during that time. And if the resolution is more than 85Hz, you will see the black screen because the LCD Monitor does not support over 85Hz.

Refer to Specifications > Preset Timing Modes for the resolutions or frequencies supported by the LCD Monitor.

## Maintenance and Cleaning

- 1) Maintaining the LCD Monitor Case.

Clean with a soft cloth after disconnecting the power cord.

- Do not use benzene, thinner or other flammable substances, or a wet cloth.
- We recommend that a SAMSUNG cleansing agent is used to prevent damage to the screen.

## 2) Maintaining the Flat Panel Display Screen.

Clean with a soft cloth (cotton flannel) smoothly.

- Never use acetone, benzene or thinner.  
(They may cause flaws or deformation of the screen surface.)
- The user will be required to pay costs and related expenses for repairing damages caused.

## Symptoms and Recommended Actions

### Note

A LCD Monitor recreates visual signals received from the computer. Therefore, if there is a problem with the computer or the video card, this can cause the LCD Monitor to become blank, have poor coloring, become noisy, and video mode not supported, etc. In this case, first check the source of the problem, and then contact a Service Center or your dealer.

1. Check if the power cord and the video cables are properly connected to the computer.
2. Check if the computer beeps more than 3 times when booting.  
(If it does, request an a service for the main board of the computer.)
3. If you installed a new video card or if you assembled the PC, check if you installed the Adaptor(video).
4. Check if the scanning ratio of the video screen is set to between 50 Hz ~ 85 Hz.  
(Do not exceed 60Hz when using the maximum resolution.)
5. If you have problems in installing the Adaptor (video) driver, boot the computer in Safe Mode, remove the Display Adaptor in the "Control Panel -> System -> Device Administrator" and then reboot the computer to reinstall the Adaptor (video) driver.

## Check List

### Note

- The following table lists possible problems and their solutions. Before calling for assistance, check the information in this section to see if you can remedy any problems for yourself. If you do need assistance, please call the phone number on the Information section or contact your dealer.
- For more network-related information, refer to the MagicInfo Troubleshooting section.

## Problems related to the Installation (PC Mode)

### Note

Problems related to the LCD Monitor installation and their solutions are listed.

Q: The LCD Monitor screen flickers.

A: Check if the signal cable between the computer and the LCD Monitor is securely connected.

(Refer to Connecting a Computer)

## Problems related to the Screen

Problems related to the LCD Monitor screen and their solutions are listed.

Q: The screen is blank and the power indicator is off.

A: Ensure that the power cord is firmly connected and the LCD Monitor is on.

(Refer to the Connecting a Computer)

Q: "**Check Signal Cable**" message.

A: Ensure that the signal cable is firmly connected to the PC or video sources.

(Refer to the Connecting a Computer)

A: Ensure that the PC or video sources are turned on.

Q: "**Not Optimum Mode**" message.

A: Check the maximum resolution and the frequency of the video Adaptor.

A: Compare these values with the data in the Preset Timing Modes Chart.

Q: The picture rolls vertically.

A: Check if the signal cable is securely connected. Re-connect it, if necessary.

(Refer to Connecting a Computer)

Q: The image is not clear; picture is blurred.

A: Run Frequency **Coarse** and **Fine** tuning.

A: Turn on again after removing all accessories (video extension cable, etc.)

A: Set the resolution and frequency to the recommended ranges.

Q: The picture image is unstable and shakes.

A: Check if the resolution and frequency set for the computer video card falls in the range supported by the LCD Monitor. If not, reset them referring to the current Information under the LCD Monitor menu and Preset Timing Modes.

Q: Ghost images are shown in the picture.

A: Check if the resolution and frequency set for the computer video card falls in the range supported by the LCD Monitor. If not, reset them referring to the current Information under the LCD Monitor menu and Preset Timing Modes.

Q: The image is too light or too dark.

A: Adjusts the **brightness** and **contrast**.

(Refer to the **Brightness, Contrast**)

- Q: The screen color is inconsistent.
- A: Adjust color using **Custom** under OSD Color Adjustment menu.
- Q: The color image is distorted by dark shadows.
- A: Adjust color using **Custom** under OSD Color Adjustment menu.
- Q: The color white is poor.
- A: Adjust color using **Custom** under OSD Color Adjustment menu.
- Q: The Power Indicator blinks.
- A: The LCD Monitor is currently saving the changes made in the settings to the OSD memory.
- Q: The screen is blank and the power indicator light blinks every 0.5 or 1 seconds.
- A: The LCD Monitor is using its power management system.
- Press any key on the keyboard.
- Q: The screen is blank and it is blinking.
- A: If you see the "**TEST GOOD**" message on the screen when you pressing the MENU button, check the cable connection between the LCD Monitor and the computer to ensure that the connector is properly connected.

### Problems related to Audio

Problems related to audio signals and their solutions are listed below.

- Q: No sound.
- A: Ensure that the audio cable is firmly connected to both the audio-in port on your LCD Monitor and the audio-out port on your sound card.
- (Refer to the Connecting a Computer)
- A: Check the volume level.
- Q: The sound level is too low.
- A: Check the volume level.
- A: If the volume is still too low after turning the control to its maximum, check the volume control on the computer sound card or software program.
- Q: The sound is too high or too low.
- A: Adjusts the **Treble** and **Bass** to the appropriate levels.

### Problems related to the Remote Control

Problems related to the remote control and their solutions are listed.

- Q: The remote control buttons do not respond.

- A: Check the polarities (+/-) of the batteries.
- A: Check if the batteries are empty.
- A: Check if the power is on.
- A: Check if the power cord is securely connected.
- A: Check if a special fluorescent or neon lamp is on in the vicinity.

## Q & A

Q: How can I change the frequency?

A: The frequency can be changed by reconfiguring the video card.

### Note

That video card support can vary, depending on the version of the driver used. (Refer to the computer or the video card manual for details.)

Q: How can I Adjusts the resolution?

A: Windows XP:

Set the resolution in the Control Panel → Appearance and Themes → Display → Settings.

A: Windows ME/2000:

Set the resolution in the Control Panel → Display → Settings.

\* Contact the video card manufacturer for details.

Q: How can I set the Power Saving function?

A: Windows XP:

Set the resolution in the Control Panel → Appearance and Themes → Display → Screen Saver.

Set the function in the BIOS-SETUP of the computer. (Refer to the Windows / Computer Manual).

A: Windows ME/2000:

Set the resolution at the Control Panel → Display → Screen Saver.

Set the function in the BIOS-SETUP of the computer. (Refer to the Windows / Computer Manual).

Q: How can I clean the outer case/LCD Panel?

A: Disconnect the power cord and then clean the LCD Monitor with a soft cloth, using either a cleaning solution or plain water.

Do not leave any detergent or scratches on the case. Do not let any water enter the LCD Monitor.

Q: How can I play the video?

A: The video supports the MPEG1 and WMV codecs only. Install the corresponding codec to play the video. Note that some of the codecs can be incompatible.

 **Note**

Before calling for assistance, check the information in this section to see if you can remedy any problems yourself. If you do need assistance, please call the phone number on the Information section or contact your dealer.

## Environmental considerations

Operating	Temperature : 32°F ~ 104°F (0°C ~ 40°C) Humidity : 10 % ~ 80 %, non-condensing
Storage	Temperature : -4°F ~ 113°F (-20°C ~ 45°C) Humidity : 5 % ~ 95 %, non-condensing

## Plug and Play Capability

This LCD Monitor can be installed on any Plug & Play compatible system. The interaction of the LCD Monitor and the computer systems will provide the best operating conditions and LCD Monitor settings. In most cases, the LCD Monitor installation will proceed automatically, unless the user wishes to select alternate settings.

## Dot Acceptable

TFT-LCD panels manufactured by using advanced semiconductor technology with precision of 1ppm (one millionth) above are used for this product. But the pixels of RED, GREEN, BLUE and WHITE color appear to be bright sometimes or some black pixels may be seen. This is not from bad quality and you can use it without any problems.

For example, the number of TFT-LCD sub pixels contained in this product are 6,220,800.

### Note

Design and specifications are subject to change without prior notice.

### Class B Equipment (Information Communication equipment for residential use)

This product complies with the Electromagnetic Compatibility Directives for residential use and can be used in all areas including common residential areas. (Class B equipment emits less electromagnetic waves than Class A equipment.)

## **PowerSaver**

This LCD Monitor has a built-in power management system called PowerSaver. This system saves energy by switching your LCD Monitor to low-power mode when it has not been used for a certain amount of time. The LCD Monitor automatically returns to normal operation when you press a key on the keyboard. For energy conservation, turn your LCD Monitor OFF when it is not needed, or when leaving it unattended for long periods. The PowerSaver system operates with a VESA DPM compliant video card installed in your computer. Use the software utility installed on your computer to set up this feature.

### Horizontal Frequency

The time to scan one line connecting the right edge to the left edge of the screen horizontally is called the Horizontal Cycle and the inverse number of the Horizontal Cycle is called the Horizontal Frequency. Unit: kHz

### Vertical Frequency

Like a fluorescent lamp, the screen has to repeat the same image many times per second to display an image to the user. The frequency of this repetition is called the Vertical Frequency or Refresh Rate. Unit: Hz

# Information

## For Better Display

- Adjust the computer resolution and screen injection rate (refresh rate) on the computer as described below to enjoy the best picture quality. You can have an uneven picture quality on screen if the best picture quality is not provided for TFT-LCD.
- Resolution: 1920 x 1080
- Vertical frequency (refresh rate): 60 Hz
- TFT-LCD panels manufactured by using advanced semiconductor technology with a precision of 1ppm (one millionth) and above is used for this product. But the pixels of RED, GREEN, BLUE and WHITE color seem to be bright sometimes or some of black pixels could be seen. This is not from bad quality and you can use it without any problems.
- For example, the number of TFT-LCD sub pixels contained in this product are 6,220,800.
- When cleaning the monitor and the panel outside, please apply the recommended small amount of cleaner by using a soft cloth to polish. Do not force the LCD area but rub softly. If excessive force is applied, you may stain it.
- If you are not satisfied with the picture quality, you can get better quality of picture by performing the "**Auto Adjustment** function" in display screen that is appeared as window termination button is pressed. If there's still noise after the automatic adjustment, use the **Fine/Coarse** adjustment function.
- When viewing a fixed screen for an extended period of time, a residual image or blurriness may appear. Change the mode to energy save or set a screensaver to move the picture when you need to be away from the monitor for an extended period of time.

## PRODUCT INFORMATION (Image Retention Free)

### ➤ *What is Image Retention ?*

Image retention may not occur when a LCD panel is operated under normal conditions.

Normal conditions are defined as continuously changing video patterns. When the LCD panel is operated for a long time with a fixed pattern (over 12 hours), there may be slight difference in voltage between electrodes that work the liquid crystal (LC) in a pixel. The voltage difference between electrodes increases with time, forcing the liquid crystal to lean. When this occurs, the previous image may be seen when the pattern is changed. To prevent this, the accumulated voltage difference must be decreased.

+ *Power Off, Screen Saver, or Power Save Mode*

- Turn the power off for 4 hours after 20 hours in use
- Turn the power off for 2 hours after 12 hours in use
- Set the Monitor to power off with the PC Display Properties Power Scheme.
- Use a Screen saver if possible - Screen saver in one color or a moving image is recommended.

+ *Change the Color Information periodically*

**Note**

Use Two different colors

Rotate the Color Information with 2 different colors every 30 minutes.

- Avoid using a combination of characters and background color with large difference in luminance.

Avoid using Grey colors, which can cause Image retention easily.

Avoid: Colors with big difference in luminance (Black & White, Grey)

➤ *Change the characters color periodically*

- Use Bright colors with little difference in luminance.
  - Cycle : Change the characters color and background color every 30 minutes

- Every 30 minutes, change the characters with movement.

- All area display Moving image together with Logo periodically.
  - Cycle: Display moving image together with Logo for 60 seconds after 4 hours in use.
- The best way to protect your monitor from Image retention is to turn Power off, or set your PC, or System to operate a Screen Saver program when you are not using it. Also Warranty service will be limited based on instruction guide.

➤ *Apply the Screen Scroll function on Product*

- Apply the Screen Scroll function
  - Symptom: Horizontal Bar with Black Color move up and down.

- **Select method**

- Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Screen Scroll
- Time Interval : 1 ~ 10 hours ( Recommend : 1 )
- Time Period : 1 ~ 5 second ( Recommend : 5 )

 **Note**

( Please check CD's User Guide at "OSD Function", some model's will not available )

 *Apply the Screen Pixel function on Product*

- Apply the Screen Pixel function
  - Symptom: Dot with Black Color move up and down.

**- Select method**

- Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Pixel
- Time Interval : 1 ~ 10 hours ( Recommend : 1 )
- Time Period : 10 ~ 50 second ( Recommend : 50 )
- Apply the Screen Bar function
  - Symptom: Horizontal / Vertical Bar with Black Color move up and down.

**- Select method**

- Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Bar
- Time Interval : 1 ~ 10 hours ( Recommend : 1 )
- Time Period : 10 ~ 50 second ( Recommend : 50 )

 **Note**

( Please check CD's User Guide at "OSD Function", some model's will not available. )

 *Apply the Screen Erasing function on Product*

- Apply the Screen Erasing function
  - Symptom: 2 Vertical blocks move with erasing the display

FLIGHT	TIME
OZ348	20:30
UA102	21:10

**- Select method**

- Instruction Guide : OSD Menu -> Set Up -> Safety Screen -> Eraser
- Time Interval : 1 ~ 10 hours ( Recommend : 1 )
- Time Period : 10 ~ 50 second ( Recommend : 50 )

 **Note**

( Please check CD's User Guide at "OSD Function", some model's will not available )

**Terms**

Dot Pitch	The image on a monitor is composed of red, green and blue dots. The closer the dots, the higher the resolution. The distance between two dots of the same color is called the 'Dot Pitch'. Unit: mm
Vertical Frequency	The screen must be redrawn several times per second in order to create and display an image for the user. The frequency of this repetition per second is called the Vertical Frequency or Refresh Rate. Unit: Hz  Example: If the same light repeats itself 60 times per second, this is regarded as 60 Hz.

Horizontal Frequency	The time to scan one line connecting the right edge to the left edge of the screen horizontally is called the Horizontal Cycle. The inverse number of the Horizontal Cycle is called Horizontal Frequency. Unit: kHz
Interlace and Non-Interlace Methods	Showing the horizontal lines of the screen from the top to the bottom sequentially is called the Non-Interlace method while showing odd lines and then even lines in turn is called the Interlace method. The Non-Interlace method is used for the majority of monitors to ensure a clear image. The Interlace method is the same as that used in TVs.
Plug & Play	This is a function that provides the best quality screen for the user by allowing the computer and the monitor to exchange information automatically. This monitor follows the international standard VESA DDC for the Plug & Play function.
Resolution	<p>The number of horizontal and vertical dots used to compose the screen image is called the 'resolution'. This number shows the accuracy of the display. A high resolution is good for performing multiple tasks as more image information can be shown on the screen.</p> <p>Example: If the resolution is 1920 x 1080, this means the screen is composed of 1920 horizontal dots (horizontal resolution) and 1080 vertical lines (vertical resolution).</p>
SRS TS XT	This feature outputs sonorous and vivid 3D sound as for 5.1 channel speaker sound but through a 2-channel speaker. It has a good effect when stereo signals are input.

## Correct Disposal

### Correct Disposal of This Product (Waste Electrical & Electronic Equipment) - Europe only

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

### Correct Disposal of This Product (Waste Electrical & Electronic Equipment) - Europe only

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

### Correct disposal of batteries in this product - Europe only

(Applicable in the European Union and other European countries with separate battery return systems.)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.

#### Note

The rechargeable battery incorporated in this product is not user replaceable. For information on its replacement, please contact your service provider.
