Setting up the Internet Data Account

It is important this data account is created first.

This data account allows the phone (when used with a PC) to access the Internet via Vodafone. The email client also uses this.

- Scroll to **Connectivity** and press **Select**.
- Scroll to **Data Comm.** and press **Select**.
- Scroll to **Data Accounts** and press **Select**.
- Scroll to **New Account** and press **Add**.
- Scroll to **GPRS Data** and press **Select**.
- **New Account, Name:** will be displayed.
- Enter **GPRS Internet** and press **Select**.
- **New GPRS Data** will be displayed.
- Scroll to **APN** press **Yes**, enter **www.vodafone.net.nz** and press **Select**.
- Leave other settings as they are – blank or default settings.
- Scroll to **Save?** and press **Select**.
- **New GPRS Data Account Created** will be displayed.

Special Note: Your Ericsson mobile may have been preconfigured. If your phone has Data Accounts already, ignore the instructions on this page.

 - Press the **Back** button to return to Vodafone standby screen

Setting up a Data Account for access to an ISP by dialup access

This data account allows the phone to directly call into an ISP.

Special Note: Your Ericsson mobile may have been preconfigured. If your phone has Data Accounts already, ignore the instructions on

- With a POP and SMTP client built in, the Sony Ericsson is capable for sending & receiving email directly.
- The first step is to set-up a data account but this time rather than configuring it for Vodafone, you put in your Internet Service Provider's (ISP.)
- **Account Name** : Your ISP's name
- **Phone Number** : Your ISP's dial-up number (include the area code)
- **User ID** : Your normal user name for your ISP
- **Password** : Your normal password for your ISP
- Once the Data Account is set-up, return to the main screen.

Setting up and using the Email Client

- Scroll to **Messaging** and press **Select**.
- Scroll down to **Email** and press **Select**.
- Scroll down to **Options** and press **Select**.
- Scroll down to **Edit Account** and press **Select**.
- Select **New Account** and press **Add**.
- Enter a name for you Mail Account and press **OK**.
- **Connect Using** : Select the **GPRS Internet** Data Account
- **Protocol** : Select POP3
- **Incoming Server** : Contact your ISP if you are unsure
- **Incoming Port** : 110
- **Mailbox** : User Mail Accounts username
- **Password** : User Mail Accounts password
- **Outgoing Server** : Contact your ISP if you are unsure
- **Outgoing Port** : 25
- **Email Address** : Enter your full email address
- **Download** : Select Headers & Text or Headers Only
- **From Name** : Enter your full name
- **Signature** : No signature
- **Copy Outgoing** : Off
- **Check interval** : Off - Do not turn this on
- For Outgoing Server you can use **smtp.vodafone.net.nz**
- Once the Email settings are completed, go to **Email** (under **Messages**) and from here you can compose new messages and check for new mail.

Using the E-mail Client GSM Data

Use your ISP data account to access the Internet – to then access your ISP's servers.

For general Internet access and email see Setting up the Internet Data Account Which is at the very top of this guide?

- If you wish to use GSM Data with the Email Client, it is simply a matter of changing the Data Account – details are listed below.
- Scroll to **Messaging** and press **Select**.
- Scroll down to **E-mail** and press **Select**.
- Scroll down to **Options** and press **Select**.
- Scroll down to **Edit Account** and press **Select**.
- Select your Mail Account and press **Select**.
- Select **Connect Using** and change it to the data account for your ISP.
- If you are unable to communicate with the POP or SMTP servers, try changing the addresses to their IP addresses instead.
