

bodum®

«I have a clear vision: I want excellent design to be affordable for everyone. I genuinely believe that good design doesn't have to be expensive. The products in this catalogue are the manifestation of this belief – they are highly practical and of simple beauty. A lot of them have more than one use. That's actually what I enjoy most – being able to enhance the usability of a product through excellent design.

The Bodum company stores have become somewhat of a laboratory, where our products are seen the way they truly are. The windows showcasing our designs – as well as our fair prices – attract people to enter the stores. The stores are where we get the real opportunity to hear honest opinions about every single facet of our products. A lot of times we discover new ideas for existing products – and products to be developed in the future – from listening very closely to what our customers think. We gather all this information and work it into both new and existing designs for world-wide release. In each of our Bodum stores we've set up a little coffee bar where we show how our coffee and tea makers work. The difference between the Bodum way of brewing versus any other method can be experienced first hand. Or first taste bud, for that matter. And last but not least – we offer an exquisite selection of coffees and teas. Please feel free to come to Bodum and taste for yourself.»

COFFEE

«Black as the devil, hot as hell, pure as an angel, sweet as love.» That's how Talleyrand, the 18th century French diplomat, described his concept of good coffee. Coffee makes us think, talk, read, write, and pursue a host of other mental activities. The Turks even called their cafés «schools of the wise». And in 17th century England coffee houses were referred to as «penny universities». Whether you like your morning coffee in a café or at home, nothing beats jump-starting your day with the perfect cup of coffee.

For each 1.25 dl/4 oz of water put 1 rounded tablespoon or 1 BODUM® scoop of coarse ground coffee into the pot.

1

Pour hot water into the pot. Leave a minimum of 2.5 cm/1 inch of space at the top. Stir the brew with a plastic spoon.

2

Hold the pot handle firmly with the spout turned away from you, then using just the weight of your hand, apply slight pressure on top of the knob to lower the plunger straight down into the pot.

3

Turn the lid to open the pour spout and then pour coffee.

After removing the cap & plunger, put coarse ground coffee into the Travel Press.

Bodum recommends 1 tablespoon of coffee for each 1.25/4 oz of water.

1

Pour a little water just off the boil into the Travel Press and wait a few seconds before filling up to 3 cm/1 inch from the top.

Stir the brew.

2

Wait 4 minutes to ensure full flavour extraction.

Make sure the spout is closed. Secure the cap onto the Travel Press by moving it in the clockwise direction.

Hold the Travel Press firmly, and carefully depress the plunger.

3

Open the spout to add milk and sugar to your personal taste. Stir the coffee.

Fill the frother to the fill line with cold skimmed (non-fat) milk.

1

Insert the plunger into the frother carafe fitting the lid into the carafe.

2

Hold the frother with one hand. Grasp the plunger knob with your other hand and by moving the knob up and down, plunge till you feel the milk getting thicker.

3

Remove the lid and plunger and let the milk rest for about one minute. Spoon the froth out of your frother and onto your coffee.

TEA

Next to water, tea is the most affordable drink in the world. That doesn't mean it isn't precious. In fact, tea is a cultural drink for which there have been many, many rituals throughout time. According to Chinese mythology, the first cup of tea was accidentally made in 2737 BC. The Chinese Emperor, Shen Nung, scholar and herbalist, was quietly sitting beneath a tree while his servant dutifully boiled the drinking water. A leaf from the tree above dropped into the water, and when the water was fully boiled, Shen Nung decided to try the new leafy drink. He loved it. The tree was a wild tea tree, and the rest is history.

Put the desired amount of tea into the center column.

Bodum recommends 2–3 tablespoons of tea for each litre of water.

1

Pour in hot water. The maximum fill line is 4 cm below the spout.

Place lid on pot with the plunger in the raised position. Let tea brew. We recommend 3–5 minutes for black teas, or 5–10 minutes for herbal or fruit teas.

2

When the tea has reached your preferred strength, push the plunger down firmly.

3

The tea is now sealed in the base of the column, away from the hot water. Brewing is stopped and your tea will remain at its current strength.

Serve and enjoy.

TABLETOP

It's a common misunderstanding that taste buds are sitting on your tongue. Actually, they are located right in your eyes. That's what we at Bodum think, anyway. And it's what led us to create a wide variety of timeless, visually classic, styles. In their modern and simple way, their only purpose is to show your beautiful and delicious creations from their best profile – their very own. Bon appétit.

FUSION

Fusion cuisine takes your senses on a trip around the world. And saves you the airplane ticket on top of it. Fusion is an evolving, ever changing style of cooking that combines the best of Asian to Southern to Caribbean to African to Mediterranean (well, you get the idea) cuisine. The only thing that stays the same is your passion for the freshest ingredients and spices and herbs from around the world to create a new twist in your everyday life.

KITCHEN

There's nowhere it's as true as in the kitchen: the right tools make the difference between work and fun. Chopping vegetables for a ratatouille feels like a never ending duty with the wrong knife, but becomes as carefree as a pleasant walk in the park with the right one. There are lots of different cuisines around the world with even more special recipes, guarded by the best chefs. But there's one thing all chefs have in common – they all work with only the best of tools. So should you.

ELECTRIC

In the fifties Peter Bodum, the father of today's Bodum owner, Jørgen Bodum, developed the first Bodum vacuum coffee maker, called the Santos. Now, half a century later, the new Santos is the high-tech version of the original that created a sensation when it arrived in the fifties. Speaking of sensations: The American Coffee Association just declared the new Santos «The Best Brewing Equipment of the Year». And by the way, Bodum has developed and perfected various brewing systems for various tastes. Find the one to suit yours on the following pages.

BARBECUE

Barbecuing is one of the most social forms of cooking. Everyone loves to share their secret family BBQ recipe with you. And when the old fight about whether the steak should be seasoned before or after comes up again, that's when you affectionately realize that it's not just the great outdoors that you love about BBQ, that the most important thing about it are the people you love. And that those people are even more important than the simply superb Bodum BBQ tableware and grill equipment. (And we really don't like to admit that.)

WOOD

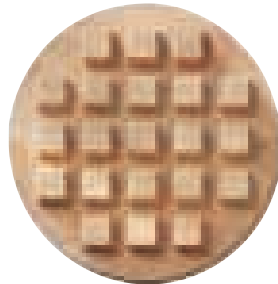

At Bodum we love combining the light and simple shapes of modernity with the most natural and traditional of materials – wood, for example. Danish beech wood and teak are crafted into a contemporary kitchen and tableware collection to complement any style preference you may have. There's something to be said about the perfect match of wonderful food and wood – it's a natural.
